General Notes

- A diagnostic test 2 will be done during the first week as allocated in the overview. It will be conducted for grade 5 boys ONLY.
- All the support lessons will be dedicated to enhancing reading and writing skills aligned with the plan titled (Literacy Plan). Make sure to utilize the students' notebooks.
- Round-up lessons can be exploited for exam revision.
- Make sure to avoid including any vocabulary words linked to enrichment lessons in the midterm or final exams.
- It is essential to exploit the "Grammar Reference" to focus on what students need to acquire.
- Make use of the WB for various purposes such as differentiation and formative assessment.
- Project lessons will be taught within 3 blocks except for module 8 (2 blocks)
- Key competencies are woven into the activities, and students should be acquiring and developing them. It
 must also be understood that aspects of several competencies may overlap. For example, problem-solving
 may also involve other competencies such as creative and critical thinking, inquiry and research,
 communication, as well as cooperation, and participation, depending on the type of activity.

- Engaging students in various activities requires utilizing their knowledge, skills, and attitudes through which
 they develop specific competencies. Therefore, the way teachers deal with the activities in class should help to
 maximize the benefit for students.
- The competencies of LITERACY AND COMMUNICATION are integral ones in the curriculum. For this reason, they are not mentioned in the above table.
- Values education has been taken into consideration in the design of the course. Through exposure to concepts
 and ideas, as well as to specific ways of carrying out activities, students are guided to understand their place in
 the classroom and school, in their family and the wider community, and as citizens of the world.
 Simultaneously, they become conscious of their corresponding rights and responsibilities.
- The learning outcomes mentioned above are **NOT** the only outcomes of the modules. They are meant to be guidance on determining the end goals of each module. Outcomes should incorporate the appropriate match of competencies, values/cross-cutting issues along with the target skill.
