Revision Unit 6

Lila's New Glasses

Lila was a girl who had trouble seeing. She loved to ride her bike, but she couldn't see well enough to know which way to turn. She loved to play soccer, but she could never see when the ball was coming her way! Most of all, Lila loved to go to school... but she always had a very **hard** time reading the lesson on the blackboard. One day Lila's mother took her to the eye doctor. The eye doctor looked at Lila's eyes and instantly knew that Lila was going to need a pair of glasses. At first, Lila was very sad that she was going to have to wear glasses. The doctor told her that glasses help people see, and that once she had a pair of her own, she would be able to do all of the things that she loved! Lila decided that maybe it wouldn't be so bad after all. Once Lila put on her glasses, she could not believe all the amazing things there were to see! She could ride her bike up and down the neighborhood. She could play soccer with her friends... and most exciting of all, Lila could finally read the lesson on the blackboard at school. Lila was so happy to finally be able to see, and wore her pair of glasses every single day.

Near our city, there is a big forest. It is so beautiful, but it can be dangerous. Last week, three friends: Saleh, Ali and Nasser went walking in this forest. It was their first time to explore that forest. Suddenly, they heard a sound of something. Was it a dog, a lion, a bear or what? They couldn't recognize it but the truth was that they were so scared. They were so worried and could not know what to do? Ali- the bravest of them- volunteered to walk near the source of the sound. Suddenly, a bear jumped out of the bushes. It tried to attack the three friends. Nasser suggested that if they ran away, the bear would chase them. So, they decided to face the bear. Saleh picked up a big tree branch and tried to hit the bear. The bear grabbed the stick and broke it with its mouth. The other two children tried to get other sticks to hit the bear. Luckily, the bear saw a small rabbit running among the bushes. It ran into the bushes to catch the rabbit for its breakfast. The three children sat on the grass. Polar bears are found in the frozen wilds of the arctic, in Canada, Alaska, Greenland, Russia and Norway. These are big bears. Adult polar bears can measure over 2.5 m long and weigh around 680 kg. Their huge body and weight make them the largest living carnivores (meat eaters) on Earth.

Polar bears are adapted to survive in cold weather. They have thick fur that protects their bodies from the frozen air. These mammals have the best sense of smelling. They can smell a prey from up to 16 km away!

Polar bears can swim at around 10 km /h. Polar bears aren't quick enough to catch seals in open water.

Female polar bears give birth in November or December. At birth, the cubs are only around 30 cm long and weigh around half a kilogram.
