1 Bill and Tom went sailing in their small boat on their holiday. They wanted to sail round the Red Sea for two weeks. During their holiday, they saw a large group of whales. Bill and Tom were very excited.

2 Unfortunately, while they were watching them, the whales began to hit the side of the boat. Suddenly, water started flooding in the boat and they realized that they were in trouble. They quickly jumped into the lifeboat while the boat was sinking under the water.

3 Luckily, they had enough food and water for twenty days. They also had a fishing rod and a machine that turned salt water into fresh drinking water. These two things helped them to survive during their awful experience.

4 For the next 50 days they caught about twenty fish and ate them raw. They saw about five ships, they waved and shouted but nobody saw them.

5 They felt very weak and extremely frightened. Then, just as they were beginning to lose hope, a fishing boat saved them. Their disastrous holiday was over, and they reached their home safely, but very tired.

1 Polar bears are found in the frozen wilds of the arctic, in Canada, Alaska, Greenland, Russia and Norway. These are big bears. Adult polar bears can measure over 2.5 m long and weigh around 680 kg. Their huge body and weight make them the largest living carnivores (meat eaters) on Earth.

2 Polar bears are adapted to survive in cold weather. They have thick fur that protects their bodies from the frozen air. These mammals have the best sense of smelling. They can smell a prey from up to 16 km away!

3 Polar bears can swim at around 10 km /h. Polar bears aren't quick enough to catch seals in open water. Female polar bears give birth in November or December. At birth, the cubs are only around 30 cm long and weigh around half a kilogram. Sadly, polar bears are in danger. The biggest problem to polar bears is climate change.

Read the following and put ✓ or ✗:

1. Polar bears can't live in cold weather. (.....)
