**(Reading) الجزء الثالث: القراءة**

5. أقرأ النص التالي وأجب على الأسئلة:

**Accidental Inventions**

Some of the most useful inventions were discovered by accident. For example, the microwave was invented when a scientist noticed that chocolate in his pocket melted while he was working on a machine. Another example is Velcro, which was invented when a man noticed how seeds stuck to his clothes. These inventions show that sometimes great ideas come when we least expect them.

أسئلة:

1. How was the microwave invented?
2. What did the man notice about the seeds?
3. What do these inventions show?

الإجابات:

1. The microwave was invented when a scientist noticed that chocolate in his pocket melted while he was working on a machine.
2. The man noticed that the seeds stuck to his clothes.
3. These inventions show that sometimes great ideas come when we least expect them.

مثال للإجابة:

One useful invention in my home is the washing machine. We use it to wash our clothes quickly and easily. Before we had a washing machine, we had to wash clothes by hand, which took a lot of time. Now, we can wash many clothes at once, and it saves us a lot of effort. The washing machine is very important to me because it helps keep our clothes clean and saves time for other activities.
