Usages of Arabic Prepositions

By

Yaman Hussien

Usages preposition in Arabic sentences correctly has been always an issue for non-native Arabic speakers. Even advanced learners of Arabic find prepositions difficult, as a 1:1 translation is usually not possible. One preposition in your native language might have several translations depending on the situation. This guide is a participation to help learning when and which one to use in Arabic language.

For each preposition, you'll find a table of most usages and plenty of examples. Some verbs in Arabic always come with specific preposition (s). That's why, reading a lot and looking them up in a dictionary can be very helpful.

I looked in different references and dictionaries to came up with simple way to deliver these information. I also used online Oxford dictionary to make comparison between Arabic and English prepositions. There are translation for all Arabic examples to help learners clear any confusing that might be in this area.

As you had notice, this edition is just a trail. You can use it for any education purposes for yourself and for others (if you're a teacher) but not for commercial usages.

We're in EVERYDAY-ARABIC commit to service Arabic language by fun and new ideas. Have a visit to the website. We'll be pleasant to have you there.
