Q.1/ Read the text then answer the following question

(10 points)

What is AI?

AI is already a part of our lives in the form of the computer technology. This type of AI is called Narrow AI and it focuses on a particular task it has been programmed to do. For example, it can be used for the GPS systems in a car, or the voice recognition systems that let us talk to our smart devices. AI suggests music for us to listen to, it can remind us to do something important, and is also used in social media to send users adverts. General AI, on the other hand, allows machines to learn, reason and make judgements based on previous experiences – just like humans!

(هذه إجابة مقترحة، ويمكن للطالب الكتابة بحرية)

My mobile phone helps me in many ways. I use it to communicate with my friends and family through calls and messages. It also helps me in my studies by searching for information on the internet. I use its GPS to find directions when I travel. Furthermore, I listen to music, take photos, and set reminders for my important tasks.
