* Write a holiday plan (Unit 11)

Hello, I'm Dana. This year, I'm going to New York City with my family. We're going to stay in an apartment in the centre of the city. I love sightseeing and there are lots of great things to see there. Central park is one of the famous places in New York City. I also like playing tennis, so I'm going to go to the tennis courts in the park.

Also, I'm going on a beach holiday because I enjoy beach holidays. We will do lots of swimming and maybe some fishing. I'll miss my friends, but I'll see them when I get home.

* Write about your favourite kind of holiday (Unit 11)

There are different types of holidays such as: beach holiday, Island holiday, adventure holiday, sporting holiday, camping holiday, sailing holiday

For me, I love going on beach holiday because I enjoy beach holiday.. We stay in a large hotel close to the beach. We get there by plane. I don't mind flying but my dad hates it. I enjoy reading a book on the beach, but I prefer swimming in the sea. It's my favourite thing to do on holiday.

My dad loves fishing and sailing. His favourite thing to do on holiday is to go on a fishing trip in the ocean.

Going on a holiday is interesting and exciting for me.

* Write about what to do at the airport (Unit 11)

When you arrive at the airport, go to the check-in desk. You will need to show your ticket and your passport. They will give you a boarding card.

After you have checked-in, you need to go through security control. After that you can go to the departure lounge. Look for your flight number on the screens. This will tell you which gate your flight will go. When you're at the gate, you will need to show your boarding card to get on the plane.

When you get off the plane you need to go to passport control. Then, you collect your bags at baggage reclaim. After that, you go through customs.

Finally, you can leave the airport through the arrivals lounge and begin your holiday.

* Write a postcard from a holiday destination (Unit 11)

Dear Charlie,

I hope you're well. I'm having a great time here in Mexico. My friend's house is on the coast. The weather is fantastic. We go to the beach every day. We play football, volleyball and baseball.

The food is really tasty and the fruit smoothies are delicious.

My favourite flavour is pineapple and mango.

Tomorrow we're going to see the pyramids, which is great because I love exploring old places.

Are you enjoying the summer?

See you soon,

Ara

* The perfect place to go on holiday (Unit 11)

From: Hanan

To: Aisha

Subject: The perfect place to go on holiday

Hi Aisha,

How are you? I hope you are fine. I'm writing to tell you about the perfect place to go on holiday.

We're going on holiday to Cairo in Egypt next month. Have you ever been there? I haven't, but I'm really excited about going.

My cousin is living there at the moment and she told me all about it.

She said that Cairo was one of the biggest cities in Africa, and that it was the perfect place to go on holiday because it was great for sightseeing tours.

She said that she often visited the Pyramids of Giza and the mosque of Amr Ibn Al-Aas. She has also been to the Cairo Tower and Khan El-Khalili market. She told me that the tower was very tall. She told me that the Khan El-Khalili Market was exciting and colourful. She said she was really enjoying her time in Cairo. I can't wait to go.

See you soon,

Hanan

Write a blog about a school exchange trip (Unit 11)

Hi, I'm Sara .I 'm from Egypt. I went on a school exchange trip to Dubai last month. It was really exciting and amazing.

I saw BurjKhalifa one of the most famous building in Dubai. Also I took a photoof my class. The students asked me how old I was. They asked me where I was staying, and what I watched on TV.

They asked me if I was Jordanian, if I liked basketball and I could I could play an instrument. They asked me a lot of questions!

Sara

A plan for a special treat (Unit11)

We'd like to take our friend Dana out. She loves fashion and jewellery, and she's also very interested in wildlife, so I'll take her to the Dubai Mall. We'll go shopping, and then we'll go to the aquarium in the mall.

We'll go in the next school holiday, and we'll stay in Dubai for two or three days. We'll get there by bus. It's not far from here, but Dana has never there before. I think she'll love it.

Helping people can bring happiness. It's also act of kindness.

Nour Ahmed

* Write about the weather in the UAE (Unit 12)

The UAE is one of the countries that has two seasons, summer and winter.

The hot season is summer because the temperature is very high it can reach above a very hot 45 C in July and August, and you can't go out for long time.

The most beautiful season is the winter. Because the weather is very nice, the temperature is around 20 C in the day of winter months January and February. It's not hot or so cold. I like this season because I can play in the parks with my friends. Also, I can go to the sea to swim in the cold water. I enjoy watching the rain fall and sometimes I play in it. There isn't much rain in the UAE.

The UAE is so dry that are sometimes sandstorms, which can be a problem. There was snow for the first time in the UAE in 2004.

Write about the climate change (Unit 12)

The climate of the world is changing because of the increasing global warming. Scientists think that the Earth is getting warmer; this is because there is more greenhouse from driving so many cars and building so many factories.

If the Earth gets warmer, it causes a lot of problems for our natural world.

Global warming can cause extreme weather conditions.

Heatwaves, floods, hurricanes, sandstorms and thunderstorm are all types of extreme weather and they are happening more often.

We need to stop and to make our planet safer.(How to stop global warming)

1- We need to stop using our cars so much.

We can do this by walking, cycling and trying to use public transport rather than taking the car

2- We can try to find energy in ways that are friendly to the environment

For example we can get energy from the Sun and wind.

3- We can try to save energy by turning off anything that uses electricity when we are not using it and by taking showers instead of baths.

Write about energy (renewable energy) (Unit 12)

- * What is renewable energy?
- * Where does it come from?
- * What are the advantages and disadvantages of renewable resources?

There are different forms of energy. Most of the energy used in homes and industry comes from fossil fuels. Coal, oil and natural gas are all fossil fuels. They are called non-renewable because it takes millions of years to make or renew them. So, we must reduce the amount of non-renewable fuels that we use.

We need to find other forms of energy that will never run out. These forms of energy are called renewable. Examples of these are energy from the sun (solar power), water (hydro power), Earth's heat (geothermal) and the wind (wind power).

Renewable energy doesn't run out, it's forever; it can be used again and again. It's called green power and clean power because it doesn't pollute the air or water. So it's friendly to the environment. But, we don't use renewable energy all the time because we can't keep wind and sunshine to use whenever we need to make more electricity.

Also, it costs more money to make electricity from renewable resources and people don't want higher electricity bills. Using fossil fuels are cheaper.

Energy is very important in our life. We can't live without energy.

Write an email about a storm (sandstorm) (Unit 12)

From: Sara
To: Rana
Subject: sandstorm

Dear Rana,

How are you? I hope you are fine. I'm going to help you in your science project about a sandstorm.

A storm is an extreme weather condition with very strong wind, heavy rain, and often thunder and lightning.

The following are some of the most common types of damaging storms.

A rainstorm, a sandstorm, a thunderstorm, tornadoes and a snowstorm.

Sandstorm

A sandstorm happens when great wind pick up sand and carry it for miles and miles. The clouds carrying the sand can be miles long.

When the sandstorm hits. You can't see anything and your eyes, mouth and nose are coated with sand.

Sandstorms are most common in dry, hot regions like the desert.

Sandstorms can destroy and hurt people. Sandstorms happen most often in the summer.

Sandstorms are slow moving with too strong winds, so you need to stay inside home and close all windows and doors. Make sure you have water.

Cover your eyes and nose with a mask to protect yourself from dusty air if you're outside and hide behind a roc to protect yourself from dusty air if you're outside and hide behind a rock.

See you soon

Sara

Write about energy (Non-renewable energy) (Unit 12)

There are different forms of energy. Most of the energy used in homes and industry comes from fossil fuels. Coal, oil and natural gas are all fossil fuels. They are called non-renewable because it takes millions of years to make or renew them. So, we must reduce the amount of non-renewable fuels that we use.

The non-renewable energy will run out. It doesn't forever. It causes pollution, it pollutes the atmosphere. Burning fossil fuels produces greenhouse gases and causes to global warming.

The advantages of using non-renewable energy are: It's very cheap, efficient; it can produce a lot of energy in a short time.

Energy is very important in our life, we can't live without energy

Write about a storm(thunderstorm) (Unit 12)

Thunderstorm is a storm with lighting and thunder.

Thunder and lightning always go together because thunder is the sound that is made by lightning. This means that lightning is always followed by thunder.

When a thunderstorm is a long way, you might see the lightning but you might not hear the thunder.

Thunderstorms happen more often in hot climates and more often in summer than in winter.

When you see lightning, start counting one, two, three for each second. Continue counting until you hear thunder. Three seconds are about the same as one kilometer. But if you only count one or two seconds before you hear thunder, the storm is very close. Take care.

Write about eco-city (Unit 12)

Many architects and engineers work together as a team to turn the industrial areas into a beautiful, environmentally-friendly home for people.

The buildings are made of natural materials such as wood and stone. Every building has an open area around it, so that sunlight can come through. There's light in the apartments for at least 4-5 hours every day in spring and autumn. There are also many beautiful parks and green public spaces with amazing cycle paths.

There's some cool public transport such as light rail and boats. People don't use their own cars - there are cars that people can drive when they need to go somewhere.

In eco-city everyone recycles newspapers, food waste, old furniture, batteries, glass and plastic...almost everything can be reused. In this eco-town, paper, soil, heating and electricity can be made from waste. There is a thermal factory outside the town which produces heating, electricity and cooling power from waste and dirty water. And of course, all buildings get energy from solar panels.

Eco-city is a solution of global warming.

Write about eco-house (Unit 12)

Eco-house is a beautiful environmentally-friendly house designed and built by using recycled materials and little energy as possible.

It is a healthy green clean house.

The parts of the eco house that are used to protect the environment are amazing ways to save energy. Such as:

The wind turbine makes clean power and doesn't pollute the atmosphere.

Green roof keeps the house cool in summer and warm in winter.

Solar panels heat the water so we can have hot baths and showers.

Also, there are thick big windows and wooden structures to stop heat coming out and keep the house cool in the summer.

Eco-house is a solution of global warming.

Write a letter about what you do in Ramadan)

New School Street 20
P. O Box 35628
Ajurf
Ajman - UAE
8th May 2017

Dear Rania,

How are you? I hope you are fine. Thank you for your letter. I think you would like to know what I do in Ramadan.

Ramadan is the ninth month of the Islamic calendar. It is the Islamic month of fasting from dawn until sunset.

Ramadan is a time for Muslims to fast and offer more prayer than usual.

In Ramadan, I pray 5 times a day. I read Qur'an every day. I always speak the truth and always keep my promises. I always greet people with 'Assalamu-alaykum'. I speak politely to everyone, especially my parents. Also, I study very hard at school and masjid. I respect my parents, elders and teachers. I try to learn and follow as many Sunnah as possible. I look after my parents and always keep them happy.

Ramadan is the best of months. The doors of heaven are opened, and the doors of hell are closed.

See you soon, I love you
Dana.
