Project Consortium B:

Cito Institute for Educational Measurement University of Twente University of Jyväskyla, Institute for Educational Research Direction de l'Evaluation de la Prospective et de la Performance (DEPP) This questionnaire asks for information including:

- The structure and organisation of the school;
- The student and teacher body;
- The school's resources;
- The school's instruction, curriculum and assessment;
- The school climate;
- The school policies and practices;
- The characteristics of the headteacher/principal or designate.

This information helps illustrate the similarities and differences between groups of schools in order to better establish the context for students' test results. For example, the information provided may help to establish what effect the availability of resources may have on student achievement – both within and between countries.

The questionnaire should be completed by the headteacher/principal or another person appointed by the headteacher or principal.

It should take about 30 minutes to complete.

For some questions, specific expertise may be needed. You may consult experts to help you answer these questions.

If you do not know an answer precisely, your best estimate will be adequate for the purposes of the study.

Your answers will be kept confidential. They will be combined with answers from other schools to calculate totals and averages in which no one school can be identified.
