Spring, summer, fall and winter. Many places on the Earth have seasons. What causes the seasons? Well, it is caused by the movement of the Earth around the sun. The earth moves two ways. It spins and it moves around the sun. The spinning of the earth is called rotation. It takes the earth about 24 hours, or one day, to make one complete rotation. This causes day and night. At the same time, the earth is moving around the sun. This is called a revolution. It takes a little over 365 days, or one year, for the earth to make one full revolution around the sun. When the earth moves around the sun we get the four seasons.
