* The perfect place to go on holiday (Unit 11)

From: Hanan

To: Aisha

Subject: The perfect place to go on holiday

Hi Aisha,

How are you? I hope you are fine. I'm writing to tell you about the perfect place to go on holiday.

We're going on holiday to Cairo in Egypt next month. Have you ever been there? I haven't, but I'm really excited about going. My cousin is living there at the moment and she told me all about it. She said that Cairo was one of the biggest cities in Africa, and that it was the perfect place to go on holiday because it was great for sightseeing tours.

She said that she often visited the Pyramids of Giza and the mosque of Amr Ibn Al-Aas. She has also been to the Cairo Tower and Khan El-Khalili market. She told me that the tower was very tall. She told me that the Khan El-Khalili Market was exciting and colourful. She said she was really enjoying her time in Cairo. I can't wait to go.

See you soon,

Hanan

Write about energy (renewable energy) (Unit 12)

- * What is renewable energy?
- * Where does it come from?
- * What are the advantages and disadvantages of renewable resources?

There are different forms of energy. Most of the energy used in homes and industry comes from fossil fuels. Coal, oil and natural gas are all fossil fuels. They are called non-renewable because it takes millions of years to make or renew them. So, we must reduce the amount of non-renewable fuels that we use.

We need to find other forms of energy that will never run out. These forms of energy are called renewable. Examples of these are energy from the sun (solar power) ,water (hydro power) ,Earth's heat (geothermal) and the wind (wind power)

Renewable energy doesn't run out, it's forever; it can be used again and again. It's called green power and clean power because it doesn't pollute the air or water. So it's friendly to the environment. But, we don't use renewable energy all the time because we can't keep wind and sunshine to use whenever we need to make more electricity.

Also, it costs more money to make electricity from renewable resources and people don't want higher electricity bills.
Using fossil fuels are cheaper.

Energy is very important in our life .We can't live without energy.

Write an email about a storm (sandstorm) (Unit 12)

From: Sara
To: Rana
Subject: sandstorm

Dear Rana,

How are you? I hope you are fine. I'm going to help you in your science project about a sandstorm.

A storm is an extreme weather condition with very strong wind, heavy rain, and often thunder and lightning.

The following are some of the most common types of damaging storms.

A rainstorm, a sandstorm, a thunderstorm, tornadoes and a snowstorm.

Sandstorm

A sandstorm happens when great wind pick up sand and carry it for miles and miles. The clouds carrying the sand can be miles long.

When the sandstorm hits. You can't see anything and your eyes, mouth and nose are coated with sand.

Sandstorms are most common in dry, hot regions like the desert.

Sandstorms can destroy and hurt people. Sandstorms happen most often in the summer.

Sandstorms are slow moving with too strong winds, so you need to stay inside home and close all windows and doors. Make sure you have water.

Cover your eyes and nose with a mask to protect yourself from dusty air if you're outside and hide behind a roc to protect yourself from dusty air if you're outside and hide behind a rock.

See you soon
Sara

Write a blog about a school exchange trip (Unit 11)

Hi, I'm Sara .I 'm from Egypt. I went on a school exchange trip to Dubai last month. It was really exciting and amazing.

I saw BurjKhalifa one of the most famous building in Dubai. Also I took a photoof my class. The students asked me how old I was. They asked me where I was staying, and what I watched on TV.

They asked me if I was Jordanian, if I liked basketball and I could I could play an instrument. They asked me a lot of questions!

Sara

A plan for a special treat (Unit11)

We'd like to take our friend Dana out. She loves fashion and jewellery, and she's also very interested in wildlife, so I'll take her to the Dubai Mall. We'll go shopping, and then we'll go to the aquarium in the mall.

We'll go in the next school holiday, and we'll stay in Dubai for two or three days. We'll get there by bus. It's not far from here, but Dana has never there before. I think she'll love it.

Helping people can bring happiness. It's also act of kindness.

* Write about the weather in the UAE (Unit 12)

The UAE is one of the countries that has two seasons, summer and winter.

The hot season is summer because the temperature is very high it can reach above a very hot 45 C in July and August, and you can't go out for long time. The most beautiful season is the winter. Because the weather is very nice, the temperature is around 20 C in the day of winter months January and February. It's not hot or so cold. I like this season because I can play in the parks with my friends. Also, I can go to the sea to swim in the cold water. I enjoy watching the rain fall and sometimes I play in it. There isn't much rain in the UAE.

The UAE is so dry that are sometimes sandstorms, which can be a problem. There was snow for the first time in the UAE in 2004.

Write about the climate change (Unit 12)

The climate of the world is changing because of the increasing global warming. Scientists think that the Earth is getting warmer; this is because there is more greenhouse from driving so many cars and building so many factories.

If the Earth gets warmer, it causes a lot of problems for our natural world. Global warming can cause extreme weather conditions. Heatwaves, floods, hurricanes, sandstorms and thunderstorm are all types of extreme weather and they are happening more often.

We need to stop and to make our planet safer. (How to stop global warming)

1- We need to stop using our cars so much.

We can do this by walking, cycling and trying to use public transport rather than taking the car

2- We can try to find energy in ways that are friendly to the environment
For example we can get energy from the Sun and wind.

3- We can try to save energy by turning off anything that uses electricity when we are not using it and by taking showers instead of baths.

موضوع عن الامارات

Most families were living in tribes or as large families in tents. In the past, the family, including the grandfather and uncles, would all live together in one house. You don't tend to see that these days.

But now a small family size has Kanu in the past we see that the uncle with the grandfather with the father all in one house but now there is no

I don't understand what you are trying to say in this paragraph.

It was one of the returning parents to meet all of them every day but with the large number of concerns these days I said regular exchanges of visits and meetings

There was a great improvement in life and the economy after the discovery of oil. This helped to expand sources of income. In the past, most income came from agriculture, fishing and diving.

For the life of economic improvement in the economy a lot, especially after the discovery of oil Vtaddt jobs and diversified sources of income such as McCann in the past where he was relying on agriculture, fishing and diving

موضوع العائلة

The family is very important to everybody. I have a big and beautiful family. My family consists of my father, my mother, one sister and one brother. My father is a doctor, he works in a hospital and he loves his work very much. My mother is a housewife, she looks after us and also makes delicious food for us. I love my sister and my brother very much and I enjoy my free time with them. This is my family ... what about your family?
