2- Where are you going to go ?

 - He makes chairs.

3- Whose house is this ?

 - It's ours.

4- Were you at the zoo ?

 - To the hospital.**Read the following then answer the questions:**

Horses are beautiful animals. They can be different colors, and can run quickly. People like to watch horses because they are strong and powerful.

Horses are mammals. Mammals are animals that have hair or fur, are warm-blooded, and usually give birth to live young. The mother horse generally has one baby in the spring, and feeds the baby milk. Horses have long legs, and big eyes that can see almost all the way around them.

Young horses that are one year old or younger are called foals. A young female horse is called a filly, and a young male horse is called a colt. After 4 years, a horse is considered an adult. Many people think that a pony is a young horse, but that is incorrect. A pony is a type of horse that does not grow very large.

Horses can live up to 20 or 25 years. Sometimes people can tell how old a horse is by looking at its teeth! They generally sleep standing up, so that if a predator approaches, they can run away quickly. Horses only need about three hours of sleep per day!

For food, horses eat foods such as grass, hay, oats, corn, apples, and carrots. They are herbivores, meaning they do not eat other animals. Their stomachs are small, so they need small, frequent feedings.

1-What's the text about ?

- a-The life of the horses.
- b-The color of the horses.
- c- The kids of mammals.
- d- The life of the humans.

2-What does the underlined word ' mammals ' mean ?

☐

- Next week.

3- When are you going to leave ?

☐

- It's hers.

4- Whose doll is it ?

☐

- No, she wasn't.

Read the following then choose the correct answer:

A material is what something is made of. There are 5 basic materials. Most things are made with these materials. Some things are made of metal. Some things are made of glass. Some things are made of wood. Some things are made of cloth. And some things are made of plastic. There are some other materials. But they are not used as much as these

Let's talk about metal first. Metal is very heavy. And it is very hard and strong. It usually feels cool if you touch it. We use metal to make lots of things. We use it for forks and knives. We use it for keys. We use it for cars. We use it for these things because it is very strong.

Next, let's talk about glass. Glass is very smooth. It feels cool to touch. It is not as heavy as metal. It is hard. But it is not strong. It breaks very easily! Then why do we use it? We use it because it is clear! You can see through glass! That's why we use it for windows. That's also why we use it for glasses.

Now, let's talk about wood. Wood is lighter than metal and glass. It is not as strong as metal. But it is much stronger than glass. We use wood to make lots of things. Things made from wood are usually light and hard and strong. Chairs and tables are made from wood .

Now let's talk about cloth. Cloth is very light. It is much lighter than wood. And it is very soft. We use cloth to make lots of things. For example, it is used to make clothing. And it is used to make blankets. Last, let's talk about plastic. Plastic is also very light. But it is different from cloth. Sometimes it is soft. And sometimes it is hard. Plastic can be used to make thin plastic bags. These are light, soft, and strong. But plastic can also be used to make bicycle helmets. These are light, hard, and strong. A helmet and a bag seem different. But they are both made from plastic.

1- What's the purpose of the text?

- a- To give information about glass.
- b- To explain the importance of the plastic.
- c- To explain the importance of materials.
- d- To introduce new cloth.

2- Which one is very smooth?

- a- cloth.
- b- Glass.
- c- wood.
- d- plastic.

3- What does the underlined word 'light' in paragraph 5 mean?

- a- Heavy
- b- Not heavy
- c- Large
- d- Small

4- Why are chairs and tables made of wood?

.....
