Read this email from Ali to Hasan. For questions 8-14, choose the correct answer (A-C).

Dear Hasan,

Welcome to our class. I don't know what it's like to be in a new school, but I think it will help you to know more about the people. Mr. Khaled, the principal, is very busy, but you should always greet him. He thinks English is important, so he likes to ask students to spell English words. If you try to stay away from him, he will find you! I always greet him in Arabic, but I know that he will ask me to spell something in English.

You met our teachers today. Mr. Abdul teaches Maths, Mr. Rahim is our Islamic teacher, and Mr. Hamad is our Arabic teacher. You should always stand when they enter the room and greet them with "As Salaam Alaikum" and wait for them to tell you it's okay to sit. If you don't stand for Mr. Abdul, he gives you more homework. Mr. Joseph is our English teacher. We also stand for him, but we greet him with "Good morning, teacher" or "Good afternoon, teacher." If you speak Arabic in his class, he makes you stand in front of the class and read in English. Some kids like that, but I don't, so I try to speak only English in his class.

I will tell you about the other teachers tomorrow, because I have to do my homework now. See you tomorrow! Your new friend,

What would we do if there were no wheels? In my opinion, the most important invention of all time is the wheel. Without the wheel, people could not travel anywhere very easily or quickly. We depend on the wheel for all our transport, such as cars, trains and planes (because planes need wheels to take off and land). If we had to travel long distances without wheels, it would be very difficult. It would also be difficult to see other cities and countries. This means that we wouldn't know about other places and the world would seem very small for us. If we didn't have the wheel, it would be harder to work quickly and easily. This is because we need wheels to go to and from work, but also because we need wheels to carry things. Without wheels, people would have to carry heavy things in other ways. We might have to use animals or carry things ourselves. Wheels are also a very important part of machines in factories and on farms because they make the machines work. These kinds of wheels are called 'cogs'.

There are lots of very important inventions that have changed the world. But I think that the wheel is the most important for these reasons.

1. The most important invention is the...

- A wheel B lightbulb C airplane D computer

2. What is the best title for this text?

- A How to Travel B Important Inventions C Wheels around the World
D How Wheels Changed the World

3. What is one thing that DOES NOT need wheels?

- A trains B planes C boats D cars

4. Without the wheel...

- A the world would not be small B it would not be easy to travel
C other places would be far away D we would know more about our city

5. We use wheels at work to...

- A carry heavy things B carry animals C help ourselves D help animals

6. Cogs are part of...

- A farms B wheels C machines D factories

Read the film review and then answer the questions. Write no more than TWO words for each question.
There is one example

Last week my friend Ali and I went to see a science fiction film called 'Revenge of the Mutants'. It is set in outer space, in another galaxy. It's about a spaceship that gets lost in space. Then it meets an evil mutant monster that lives on another planet. We watched it in 3-D and the special effects were absolutely amazing. My favourite scene was when the monster attacked the spaceship. It was really terrifying! But the film is very long and the plot is a bit boring in parts. There are long scenes where the main characters are just travelling in space and talking a lot and nothing exciting is happening. After the film, I read on a movie website that the original version of this film was made in the 1950s. When it was first shown in cinemas, people ran out of the cinemas screaming! And they didn't even see it in 3-D!

13. Good points: the _____ were amazing
14. Bad points: some long scenes that are a little _____
15. Fun fact: people screamed during the _____ version of the film
