### Reading Comprehension

#### Mission to Mars

Do you think space exploration is a good idea? \_\_\_\_\_

What do you know about the Emirates Space Mission? \_\_\_\_\_

Read the text. Where is the space mission going?

Emirates space mission hopes to launch new era in Middle East Oman Sharaf, the man leading the Emirates Mars Mission, admits to being nervous. He feels that the reputation of the nation depends on the mission and that if they can reach Mars it shows the nation can do anything. Sharaf has a lot on his plate. The space mission will launch a space probe, which is the size of a small car, on a 60 million km journey to the red planet. It is expected to arrive seven months later. Sarah Amiri, the head of the science team, says the aim of the Mars mission is to understand how the planet's evolved – from a planet that once had flowing water to the dry world it is today. Sharaf says reaching Mars also has the broader goal of increasing the number of scientists in the UAE, developing a space sector and contributing to human knowledge. The Middle East was once the world's centre of learning and scientific discovery. Sharaf hopes the Emirates Mars Mission will lead to more scientific discoveries by the Middle East.

## Unit 8

### Reading Comprehension:

Read the passage and answer the questions that follow

Birds are very interesting animals. They come in all shapes and sizes and sometimes beautiful colours. There are many different types of birds, from ducks and geese in rivers and lakes, to birds of prey that are carnivores and eat other animals and insects. The smallest bird in the world is the male bee hummingbird, which is only 7 cm long. The tallest bird is the 2.7 metres tall ostrich which can weigh up to a staggering 120 kg! Some birds can also sing beautifully. Why do they sing? Most experts believe that birds sing to communicate with each other. ## Unit 9

### Reading Comprehension:

#### **It's Not a Bird... Not a Plane... It's a Flying Fish!**

Flying fish are found in all the major oceans. There are over 40 known species. They are most common in warmer tropical and sub-tropical areas. Of course, a flying fish doesn't actually fly like a bird does. But it can jump out of the water and glide through the air. What a great way to escape predators like mackerel, marlin, tuna and swordfish!

Flying fish have even been known to land on the decks of ships! In some parts of the world fishermen scoop flying fish right out of the air with nets. Sea birds also sometimes scoop flying fish out of the air.

Predators of flying fish include mackerel, marlin, tuna, swordfish, and humans. Night fishermen use lights to help them catch flying fish. The fishermen know that flying fish are attracted to the lights so this is a great way to lure the fish to their boats and canoes. One type of flying fish that might be seen on these tours is the California flying fish. It's one of the largest species, growing up to 18 inches long. Flying fish may not actually fly, but watching them shoot out of the water and glide above it is an exciting sight to see.

#### **Circle the right answer :**

1. If you are a freshman trying to catch a flying fish, which tool might you use?
  - a. Fishing poles and rubber lures.
  - b. buckets, minnows, and rope
  - c. spotlights and nets.

## (Unit 12) Climate and the environment

### Reading comprehension:

Read the article about an eco-school in England.

Complete the missing headings.

- A green curriculum
- A new heating technology
- A different school

1-----

Welcome to Howe Dell Primary School, the most eco-friendly building in England. It took eight years and 10.4 million to plan and build it ... But it was worth it!

2-----

The most important part of the school is the 'Intersesasonal Heat Transfer' system. This system takes heat from the sunshine that falls on the playground and stores it in thermal banks in the ground underneath the school. Then the heat can be used when it is needed, sometimes months later! This new technology can also use the cold of winter air and ice to cool the building in the summer.

3-----

But it is not just about building. The school has 'green' lessons about how everybody and everything on Earth is connected. Children also learn about green energy what they can do themselves to protect the environment. As one teacher says, "Everyone in Howe Dell believes in the same dream - children need to be educated in green issues".
