

Term 2 Science

Chapter 5:

Lesson 2 : **Water Habitats** البيئة البحرية

Habitat: is the place where animal live and have their home and food

Habitat البيئة

We have two types of habitats : **Land** habitats and **water** habitats

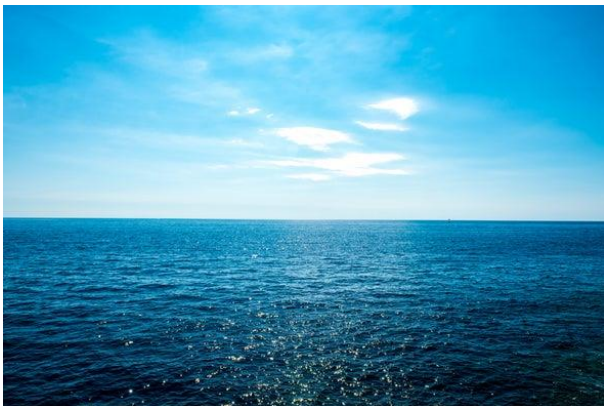

Water habitats are; **Lake** and **ocean**

A **Lake** is: water that has land all around it.

An **Ocean** is: a body of salty water that is very large and deep

Lake البحيرة

Ocean المحيط

Animals and Plants:

Plants grow in and around the water.

Animals use the plants for food and shelter

Animals and plants need each other to live

Some Ocean animals eat plants

Some ocean animals eat other animals "Small fish"

- ▲ Beavers use trees to build dams so they have a safe place to live.

يستخدم القندس أغصان الشجر لبناء منزله

- ▲ Fish have fins and tails to swim through water.
