

What earth looks like

Vocabulary

- ▶ River
 - ▶ Mountain
 - ▶ Valley
 - ▶ Plains
- 

mountain range

glacier

valley

fjord

cliffs

sea

hill

plain

river

lake

delta

ocean

cape

reef

harbor

bay

tributary

plateau

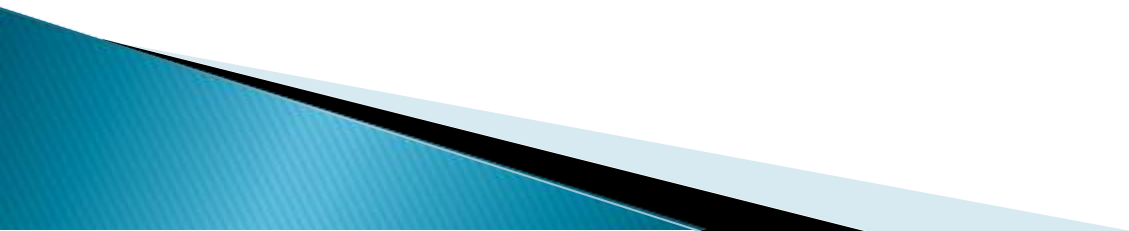

canyon

Island

- ▶ Has an area of land
- ▶ Is surrounded by water

- ▶ Land is the solid parts of earth.
- ▶ There are seven large pieces of land on earth
Each big piece of land is called a **continent**
- ▶ Water surrounds the continents

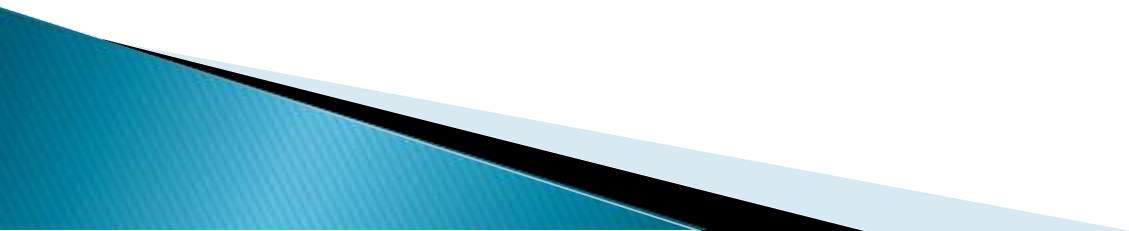

1. What makes up Earth's surface?

▶ Land

▶ Water

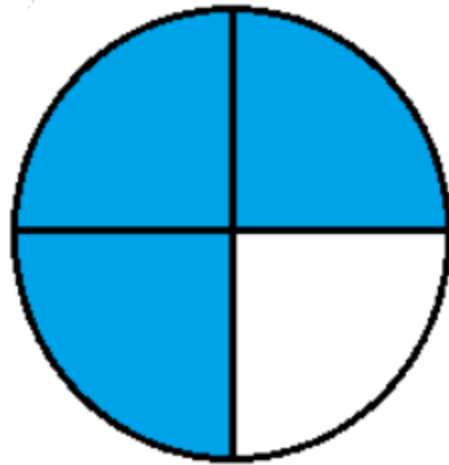

▶ Where is the water on this photo of earth?

▶ **Blue part**

What is Earth's water like?

- ▶ Most water on earth is in salty oceans
- ▶ Oceans cover about three-fourths of earth.
- ▶ Many living things cannot drink salt water.

- ▶ Fresh water is water with little or no salt.
- ▶ Streams
- ▶ Rivers
- ▶ Lakes
- ▶ Streams → River ⇒ Lake/ Ocean

Stream

River

Lake

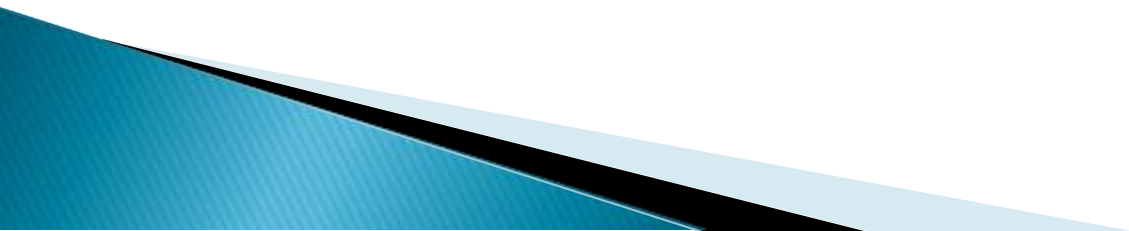

- ▶ A lake is water that has land all around

2. What are some different types of water?

Salt water

Fresh water

Mountain

- ▶ The highest type of land

Valley

- ▶ Low land between mountains

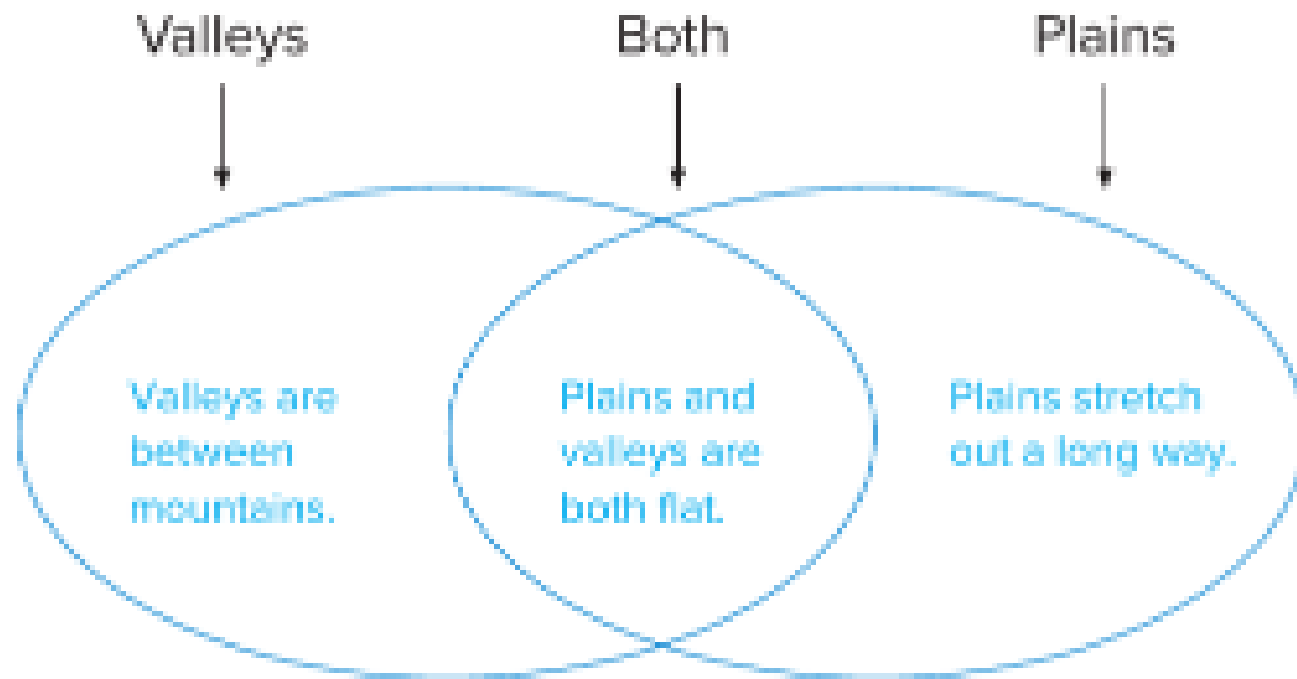

Plains

- ▶ Flat land that spreads out a long way

3. How are valleys and plains alike? How are they different?

Lesson review

Page 188

Earth's Water

Possible answer: Water covers most of

Earth. Most water on Earth is salty oceans.

Streams, rivers, and lakes can be made of

freshwater that has little or no salt.

122

Earth's Land

Possible answer: Not all land on Earth looks
the same. The land can be smooth, rocky,
or flat. Land can have high mountains or
low valleys between mountains.

Summary
