Family life

BEFORE READING

Look at the photos. Discuss the questions.

- 1 In your country, are most families big or small?
- 2 Do you think people are happier in big families or small families? Why?
- 3 What are the advantages and disadvantages of having a big family?

READ

1 Read the text quickly. Are these sentences true or false?

- 1 Sue Povey has got thirteen children.
- 2 Sue's husband stays at home and looks after the children.
- 3 Sue is happy with her big family.

SUPERMUM!

Sue Povey gets up at six every morning and makes breakfast for fifteen people. Sue has a difficult job – she works hard every day. But she doesn't work in an office. She's a mother with fifteen children, and thirteen of them live at home. Sue's family is unusual – the average British family only has 1.8 children.

Sue Povey and her family live in Swindon, in the south of England. After breakfast her husband, Ian, goes to work. Sue drives the children to school. (She needs a minibus for this!) Nine children go to school and she drives home with the other four children. Every weekday she looks after the children and cleans the house. She does the washing eight times a day, and after lunch she irons clothes for three hours. Sue spends half her life in the kitchen.

Every afternoon at 3.30 she collects the children from school in the minibus. Then she helps them with their homework. After that she cooks dinner for fifteen. Her husband comes home at six. After dinner, she goes to the supermarket with two of her sons. They help her with the shopping. She buys 50 litres of milk a week!

Sue loves her big family. All the children help Sue and help each other. The house is always lively when it's full of children!

Reading tip

When you answer multiple choice questions, read the first part of the question only and then look for the information in the text. When you have found the correct place in the text, read the options carefully and compare them with the text.

- 1 Sue has a difficult job because
- a she makes breakfast every morning.
 - b she has got a very big family.
 - c two of her children don't live at home.

For Ian, Sue's husband, family life is never boring. But they're all friends – everyone is too busy to argue. And when the children are all playing together, it can be very noisy.

Is the house ever quiet? Possibly – when all the children are in bed!

- 2 After breakfast, Sue
- a drives her husband to work.
 - b drives the children to school.
 - c looks after the children.
- 3 In the morning and afternoon, Sue
- a plays with the children.
 - b goes shopping.
 - c looks after the children.
- 4 The children come home from school
- a in the minibus.
 - b with Sue's husband.
 - c by bus.
- 5 Who helps Sue with the shopping?
- a Two daughters.
 - b Two sons.
 - c Her husband.

No pain, no gain

David Simmons comes from London, but he's in China for three months. He's a student at the Dengfeng Kung Fu School. In this interview with *Martial Arts Monthly* (MAM) David talks about life at the school.

MAM Tell me about a typical day. What time do you get up?

David Our routine is the same every day. We get up at five o'clock and start training immediately. We haven't got time to wash or have breakfast. If we're late, the teachers hit us with sticks.

MAM How do you train?

David First we train our legs, arms and stomachs. We run up and down 1000 steps and do press-ups. The training is very, very hard.

MAM How do you understand the teachers? Do you speak Chinese?

David A little, yes. But the teachers speak English, so I don't have a problem.

MAM When do you have breakfast?

David At half past seven. We have rice and soup. Training starts again at nine o'clock. We practise hitting with our hands. We learn to jump high and to kick, too. At eleven o'clock we take a break for ten minutes and then training starts again.

MAM When do you stop for lunch?

- 2 How do teachers check students' work?
- 3 Do you think life is easy or difficult for students of the School of the Air? Why?
- 4 Think of three or four things that a student's parents have to do.

A chance to meet

Once or twice a year, a teacher visits every student at home. The teacher spends a day with the student, helps them with their work and discusses problems. The teacher often has dinner with the family and stays for a night at the student's house. Teachers and students can also meet at the Sports Carnival. This **takes place** once a year on playing fields in Alice Springs. Students don't have to go, but it is a great way for them to do sport together and to make friends. 'I study on my own,' says one student, 'but I'm not **lonely**. My teachers are very friendly, and I **chat** to them quite often. I email other students most days, too. And I love the **annual** Sports Carnival!'

Secondary education in England

☐ In England, children start secondary school at the age of 11. In the first two years of secondary school, all the students study the same 12 subjects. They are: English, maths, science, design and technology, information and communication technology, history, geography, a foreign language, art and design, music, citizenship and PE. When students are 14, they can choose the subjects that they like, but some subjects (e.g. maths, English, science and P.E.) are still compulsory.

☐ At the age of 15-16, students take national exams called GCSEs (General Certificate of Secondary Education exams). After these exams, about 25% of students leave school and find jobs. The other 75% stay at school. They study two, three or four school subjects and take advanced level exams ('A levels') when they are 18.

☐ Most students in England (about 90%) go to state secondary schools. State schools are free. The other 10% go to private schools. Some of these schools are very famous – and very expensive. For example, it costs about £24,000 a year to study at Eton College!

The world's deadliest animals

What do you think are the most dangerous animals in the world? Sharks? Snakes? Lions? These animals are very dangerous, it's true, but they are certainly not the most dangerous.

A Hippos

In cartoons, hippos are usually slow, happy and comical. But real hippos are bad-tempered and aggressive, and are certainly more dangerous than lions and tigers. Hippos spend all day in the mud of rivers and lakes, but they leave the water at dusk to eat 68 kilograms of grass. Hippos are very heavy – some are about 3,000 kilos. However, they can run faster than an Olympic sprinter, and they don't like people. Hippos kill more people in Africa than any other animal.

B Box Jellyfish

When people think of dangerous animals in the sea, they usually think of sharks. But sharks hardly ever kill people. The most dangerous sea animal isn't very big. It's a small jellyfish. The body of the box jellyfish is about 20 centimetres long. But it has got about 60 tentacles – and they are about three metres long. A sting from one of these tentacles is very painful and it can kill a human very quickly. Box jellyfish swim in the seas around Australia from October to April. When the jellyfish are there, nobody goes swimming.

C Mosquitoes

The animal with the most dangerous bite isn't a snake or a lion. It's an insect and you can find it all over the world: the mosquito. Mosquitoes take people's blood and they also give malaria to over 300 million people every year. Sadly, about three million of these people die. Forty per cent of the world's population is always in danger of malaria from mosquitoes. The mosquito is the world's most dangerous animal – and it's also one of the smallest. However, it's one of the strongest, too. Mosquitoes can fly for four hours continuously and they often travel 10 kilometres a night.

- 4 There are mosquitoes
 - a in every country.
 - b that eat people.
 - c that bite lions and snakes.
- 5 The mosquito
 - a kills forty per cent of the world's population.
 - b can fly for a long time.
 - c gives malaria to animals.

Reading tip

When you scan a text for numbers, remember that they can be written as words or figures, depending on the type of text.

- 1 twenty centimetres – the body of the box jellyfish is about 20 cm long
- 2 three hundred million

- 5 sixty-eight
- 6 sixty

UNDERSTANDING IDEAS

Answer the questions. Look at the text, and use your own words and ideas.

Extreme climate

Antarctica is the coldest place in the world and it has the worst weather. The lowest temperature on record is -89°C . Antarctica is also the wettest and the driest place in the world. How is this possible? It's the wettest place because 70 per cent of the world's fresh water is in Antarctica and 90 per cent of the world's ice. And it's the driest because in one place, The Dry Valleys, it never rains or snows. The Dry Valleys is the most difficult place in the world for plants and animals – nothing can live or grow there.

A FLYING VISIT TO THE PARK

Michael Holmes first jumped from a plane when he was 16. Holmes loved the experience and he started skydiving frequently. He jumped 1,000 times before he was 19!

Later Holmes studied to become an instructor and he worked in New Zealand. One morning at an airport near Lake Taupo, he prepared for a routine jump. First of all, Holmes checked his equipment: his jumpsuit, goggles, gloves, helmet and boots. After that he checked the most important parts of a skydiver's equipment: his harness and his two parachutes. There was a main parachute and a smaller safety parachute. Finally, he looked at his altimeter. There weren't any problems and he was ready for the jump.

There were 16 students and instructors and the pilot on the plane. The plane climbed slowly to 4,500 metres and then one of the instructors opened the door; it was time to jump! There was a small camera on Holmes' helmet so that he could film the instructors with their students. They wanted to freefall for 3,000 metres and then open their parachutes.

As soon as Holmes jumped out of the plane, he filmed the skydivers. Then he looked at the altimeter on his wrist. It was time to open his own parachute, but he couldn't! The cords from his parachute were stuck together. It was impossible to open! Then he quickly tried to open the safety parachute but there was a problem. He couldn't open it because of the cords from the main parachute. He was only 1,000 metres from the ground and his life was in danger. He decided to cut the cords with a penknife but it was too late.

Holmes looked down at the ground. He could see a car park and a park next to it. He talked to the camera on his helmet. 'I'm dead. Bye,' he shouted. Suddenly, he landed in some bushes in the park. However, he wasn't dead! His left ankle and a lung were hurt but he was alive thanks to the bushes. He was in hospital for only two weeks!

A great scientist

Marie Curie was born in Warsaw, Poland, in 1867. Her father taught physics and her mother was the head teacher of a girls' school. Marie was a very intelligent student at secondary school, but she couldn't go to university because she was a woman. So she worked as a **governess** for the children of a **wealthy** family and studied secretly at a university in Warsaw. Marie was **extremely** hard-working and she sometimes stayed **awake** all night to study. Later she moved to France and studied science at the Sorbonne, a famous university in Paris. In 1906, she became the first woman to teach at the Sorbonne when she got the job of Professor of Physics.

At the university **laboratory** at the Sorbonne she met another scientist, Pierre Curie. They got married in 1895 and had two children. Pierre thought that Marie was a **genius** and he was happy to help her. Together they did a lot of important work on radioactivity and **discovered** radium and polonium. In 1903 they won the Nobel **Prize** for Physics and they used the prize money they **collected** to help **needy** students. Sadly, three-years later Pierre died in a road accident, but Marie didn't stop working. In fact, she won the Nobel Prize for Chemistry in 1911. She is the only woman to win two Nobel Prizes.

Marie Curie stayed in France for the **rest** of her life. She tried to use her discoveries to help people who were **ill** in hospital. At that time people didn't know that it was dangerous to work with radium. Marie became ill because of the radioactivity and died of cancer in 1934. In 1995 the French **government** moved the **remains** of Marie and her husband Pierre to the Panthéon, the building in Paris where people can visit the **tombs** of the most famous people in French history.

Can eating be a sport?

Sonya Thomas is not a big woman. She's 1.65 cm tall and she only weighs about 45 kilos. She usually eats healthy food – rice, vegetables, fruit, fish and chicken. But once or twice a month she has a big meal – an enormous meal – and she eats it very quickly. Why? Because she participates in eating competitions. They are very popular in the USA. One of the most famous, a meat sandwich eating competition in New York, started in 1916 and is now a tradition. And thanks to TV coverage, some competitive eaters like Sonya Thomas are celebrities. In fact, she's one of the best competitive eaters in the world. For example, she can eat:

- 1 65 boiled eggs in six minutes 40 seconds
- 2 5 kilograms of cheesecake in nine minutes
- 3 3.8 kilograms of baked beans in two minutes 47 seconds
- 4 2.3 kilograms of chicken in 12 minutes

In this interview, Sonya tells us about her life and her work.

Q: Why did you first take part in eating competitions?

A: When I was a child I saw an eating competition on TV. A man ate 50 meat sandwiches in 12 minutes. I wanted to be like him.

Q: Your nickname in competitions is 'the Black Widow'. Why did you choose that name?

A: Because in competitions I'm small but very dangerous – like the black widow spider!

Q: How do you prepare for a competition?

A: I often don't prepare at all. It's unhealthy to eat a lot of food quickly. And the night before a competition I fast so that I have a good appetite the next day.

Q: Do you do a lot of exercise?

A: Yes, I do. I exercise for about two hours a day, five days a week.

Q: How can you stay thin when you eat so much in competitions?

A: There are only one or two competitions a month. The rest of the time, I eat healthy food.

Q: Do you believe eating competitions are real sport?

A: Yes, of course! It's the most natural sport in the world. You need a strong body and a strong mind for eating competitions – just like other sports.

I have a dream

The third Monday of January each year is a national holiday in the USA. It is called Martin Luther King Day.

Martin Luther King was born in 1929 in Georgia, in the south of the USA. He studied at college and got a job in Alabama.

At that time, black and white people in the USA were not considered equal. For example, in Alabama, a black person had to stand up on a bus if a white person wanted to sit down. One day, a brave black woman called Rosa Parks refused to do this. Parks and King decided to work together to change the law. In the end they won, and in 1956 Alabama changed the law.

King continued to fight for the rights of black Americans. He made some famous speeches, won the Nobel Peace Prize in

1964, and was a hero for millions of Americans. But some white people hated him. On 3rd April 1968, he made a speech to a big crowd in Memphis, Tennessee. He talked about his enemies and his own death. The next day, James Earl Ray shot Martin Luther King.

King had four children: two boys and two girls. They all decided to continue his work and to fight for the rights of black Americans.

"I have a dream that my four children will one day live in a nation where they will not be judged by the colour of their skin but by the content of their character."

Alone on the water

BEFORE READING

Answer the questions.

- 1 Have you ever been on a boat?
- 2 How do sailors usually control a boat?
- 3 Do you notice anything unusual about the sailor in the picture?

READ

Reading tip

Newspaper and magazine articles often start with a summary of the story in the first paragraph. The other paragraphs give more details.

- 1 Read the *Reading tip*. Then read the first paragraph of the text and answer the questions.

- 1 What has Hilary Lister just done?
- 2 Why was it a great achievement?

- 2 Read the article and put the events in the correct order.

- ☐ She couldn't use her arms or hands any more.
- ☐ She started to design her own boat.
- ☐ She couldn't walk any more.
- ☐ She sailed alone across the English Channel.
- ☒ She played a lot of sports.
- ☐ A friend took her sailing for the first time.
- ☐ She had sailing lessons.
- ☐ Her legs started to hurt.

Living again!

Hilary Lister, 33, can't move her limbs or her head – she is **completely paralysed**. However, she has just sailed alone across the English Channel! How did she do it? Sam Wollaston finds out.

'Where do you want to go?' laughs Hilary Lister. We are on a boat going out of Portsmouth Harbour, and Hilary is sailing it. Suddenly, she's happy and free. Sailing does that to her. 'It's given me my life again,' she says.

Hilary is paralysed because of an unusual **disease**, but she hasn't always been like this. When she was a child she was always active, and she played a lot of sports. But when she was 11, her legs started to hurt. By the time she was 15, she couldn't walk any more.

About six years ago the disease **spread** to her arms and hands and she can't use them any more. She thought her life was **over**. Then, two years ago, a friend took her sailing for the first time. She loved it! But she didn't want to be a passenger. She wanted to sail a boat herself. So she **took up** sailing as a way to become more **confident**. 'I had this mad **dream** to sail across the English Channel,' she said.

Hilary didn't know anything about boats or sailing. But she started to **design** her own boat. Then she found a boat and some people to help her. The controls of her boat come from her **wheelchair** and she can **steer** the boat with her mouth. She **sucks** a tube to make the boat go left and **blows** into another tube to make it go right. She has had some lessons, and she is now a very good sailor.

Last month Hilary's dream came true. She left Dover alone in her boat. It was sunny but quite windy. Six hours later she arrived in Calais, France. She was **exhausted**, but very happy. It was the longest journey made by a completely paralysed person. And she has become the first **disabled** person to sail across the Channel.

Hilary says the experience has really changed her life. 'Next I want to sail around Britain,' she says.

Gap Years

This year, about 150,000 young people in the UK will take a 'gap year'. A gap year is a break between school and university, or between school and starting work in a profession. For most young people, it will be a chance to travel and to have interesting experiences.

So how do young people spend their time? A lot of students finance their gap years by working in the countries they visit and some do voluntary work. Here are three young people who are going to do very different things.

A 'Next year, I'm going to study physics at university. Before then, I want to spend some time abroad and do something completely different. I've got a student work visa for Thailand and I'm going to work at an animal rescue centre for nine months. It will be a demanding job. 3 Which jobs are popular in your country for people your age?

About half of 16- and 17-year-olds in the UK have got jobs, and three quarters of this age group also go to school. They do part-time jobs before or after school and at weekends. The most common jobs are babysitting (very popular with girls) and paper rounds (popular with boys). Cleaning and working in a shop are also popular jobs.

In the UK, school students are not allowed to work more than two hours on a school day, or more than twelve hours in total during a school week. They are not allowed to work before 7 a.m. or after 7 p.m. (but babysitters can work later). They must have at least two weeks' holiday from school each year when they don't work at all.

Teenagers do part-time jobs because they want to earn some money. However, they don't usually earn very much. In the UK, there is a minimum wage for adults: £5.52 an hour. For 16- and 17-year-olds, it is £3.40 an hour. For children under 16, there is no minimum wage, so many teenagers work for £2 or £3 an hour.

2 Read the text. Answer the questions.

- How many young people aged 16 and 17 have jobs in the UK?
- What is the most common job for teenage girls?
- What is the most common job for teenage boys?
- How many hours in total can young people work during a school week?

Past simple: affirmative (irregular verbs)

Some verbs have irregular past simple (positive) forms. There are no spelling rules for these forms; you need to learn them as vocabulary. See the list on page 124.

go → went I went shopping yesterday.

spend → spent I spent all my money.

The affirmative form of the past simple is the same for all persons, singular and plural (*I, you, he, she, it, we, they*).

I saw a friend last night.

She saw a film.

They saw the accident.

Irregular verbs behave in the same way as regular verbs in negative sentences and questions.

Remember that the past simple of *be* is *was / were*. It behaves differently from other verbs. (See Grammar Reference 6.)

Past simple: negative and interrogative

Negative	Interrogative
I didn't watch.	Did I watch?
He / She / It didn't watch.	Did he / she / it watch?
We / You / They didn't watch.	Did we / you / they watch?
Full forms	Short answers
didn't = did not	Yes, I did. / No, I didn't.

The forms are the same for all persons, singular and plural (*I, you, he, she, it, we, they*).

In negative sentences, for both regular and irregular verbs, we use:

I, you, she, it, we, they + didn't + base form

(NOT the past simple form)

In questions, for regular *and* irregular verbs, we use:

Did + I, you, he, she, it, we, they + base form

(NOT the past simple form)

Did he have breakfast?

If there are time expressions, they usually go at the end of the question.

Did he go to the swimming pool **after school**?

Did you catch a bus to school **this morning**?

We can put a question word before *did* to ask for information.

What did you do last night?

Where did they go for their holiday?

an orange two oranges
- Uncountable nouns are things that you can't count, you can only weigh or measure. They only have a singular form.
some bread I like cheese
- We use words like *bowl*, *glass*, etc. with uncountable nouns when we want to talk about quantity.
a bottle of milk a loaf of bread a kilo of cheese
a glass of lemonade

some and any

- We usually use *some* in affirmative sentences. We use it with plural nouns and uncountable nouns.
There are some apples on the table.
There's some bread on the shelf.
- We usually use *any* in negative sentences and questions. We use it with plural nouns and uncountable nouns.

How much / many ...?

We use *How much*...? with uncountable nouns.

We use *How many*...? with plural nouns.

'How many eggs do you need?' 'Six.'

Articles

We use the indefinite article (*a* or *an*) with singular countable nouns only.

a restaurant a computer

We can use the definite article (*the*) with singular and plural countable nouns:

the restaurant the restaurants

and with uncountable nouns.

the cheese

We use *an* instead of *a* when the next word begins with a vowel sound. This means most words beginning with *a-*,

e-, *i-*, *o-* and *u-* and a few words that begin with silent *h-*.

an apple an Italian restaurant an hour

Note: some words that begin with the letter *u-* do not start with a vowel sound, they start with a /y/ sound. We do not use *an* with these words.

a university a useful book a username

We use *a* or *an* when we mention something for the first time.

There's a pizza in the fridge.

We use *the* when we mention it again.

We can have the pizza for dinner.
