

**READING****(14 marks )****Q1: Read the following text carefully: (14 points)**

Emily Cummins began 'inventing' when she was only four. She enjoyed making things from waste material, like making toys from old things she found in her grandfather's garden. As she got older, she learned more about different materials and how to use different tools. She was working on a school project when she had an idea to help millions of people – a small, portable fridge to keep medicines or small food items clean, dry and cool.

In many parts of the world, people haven't got electricity. However, that doesn't mean **they** have to live without a fridge. Emily's fridge is ideal because it doesn't use electricity. People can build **it** using old car parts and other objects from their homes. After she finished school, Emily went to Africa to work on her design. She spent five months in Namibia, testing out her fridge. She decided not to produce the fridge for profit. Instead, she gave the design to people in Africa for free, so that they could produce their own portable fridges following her instructions.
