**To parents**
Skip counting and repeated addition are good ways to prepare for multiplication. In order to help your child see the link between multiplication and skip counting, point out that they are tracing the multiples of six in the charts below, for example.

■ Say each number aloud as you trace it.

| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
|---|---|---|---|---|---|---|---|---|----|
| 11 | 12 | 13 | 14 | 15 | 16 | 17 | 18 | 19 | 20 |

| 6 | 12 | 18 | 24 | 30 | 36 | 42 | 48 | 54 | 60 |
|---|----|----|----|----|----|----|----|----|----|

■ Draw a line from 6 to 60 in order while saying each number aloud.

■ Add the numbers below.

(1) $6 + 6 = 12$

(2) $6 + 6 + 6 = 18$

(3) $6 + 6 + 6 + 6 = 24$

## Why should you choose a Kumon Workbook for your child?

- Our Workbooks are based on the "Kumon Method," a learning system designed to help each child reach his or her full learning potential.

- Concepts are introduced in a step-by-step manner that allows the child to master each in turn without frustration.

- Through Kumon Workbooks, children gain confidence in their abilities and are motivated to learn on their own.

- We believe in creating the best possible products for children, so our workbooks never compromise on content or quality.
