3- What do you think of the book fair?

c. played tennis

4- Where is Fatima going to go tonight?

d. Yes, I'd love to.

Part two: Reading**Reading Comprehension : Read the passage and answer the questions.**

Thomas Edison lit up the world with his invention of the electric light. Without him, the world might still be a dark place. Thomas Edison was born in Milan in 1847. His family moved to Michigan, when he was seven years old. Surprisingly, he attended school for only two months. His mother, a former teacher, taught him a few things, but Thomas was mostly self-educated. His natural curiosity led him to start experimenting at a young age with electrical and mechanical things at home.

When he was 12 years old, he got his first job. He became a newsboy on a train. He set up a laboratory in a baggage care of the train so that he could continue his experiments in his spare time. He got his first patent in 1868 for a vote recorder run by electricity. However, the vote recorder was not a success. In 1870, he sold another invention, a stock-ticker, for \$40,000. A stock-ticker is a machine that automatically prints stock prices on a tape. He was then able to build his first shop in New Jersey.

Thomas Edison died in 1931 in New Jersey. He left numerous inventions that improved the quality of life all over the world.

1. What is the text MAINLY about?

- A. TV inventor
- B. electric light inventor
