We will learn about landscape changes.

KNOW THE RULES

- We will learn about landscape changes.

What will you need?

What are we learning today? *(review)*

- We are learning about landscape changes.
- We are learning about slow changes to the Earth's landforms.

Weathering

**BREAKING DOWN OF ROCKS
INTO SMALLER PIECES.**

Erosion

**WHEN WIND OR WATER CARRIES
ROCKS AND SOIL TO A NEW
PLACE.**

EXPLAIN
THE PHENOMENON

How did this rock
get its shape?

Summarize It

Explain what has happened to this rock. Why is it shaped this way?

**Weathering and erosion
caused this change. The
water carried away pieces
of sand and rock.**

Weathering

Rock that have been weathered by wind and maybe by blowing sand .

Erosion

The canyon was formed when water washed away the land that was around the river .

FOLDABLES

Cut out the Notebook Foldables given to you by your teacher. Glue the anchor tab as shown below.

Describe the pictures using vocabulary words.

Homework

*Have a
wonderful day!*

See you soon!
