Grade -3 Science Review sheet

1. What are some characteristics of living things?

- 1. Grow
- 2. Take in nutrients to get energy
- 3. Respond to the world around them
- 4. Reproduce
- 5. Remove Waste

2. What do living things need?

- 1. Food
- 2. Water
- 3. Gases
- 4. Space

3. Difference between living thing and non-living things.

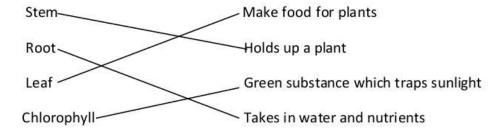

- Living things grow, eat, respond, reproduce and remove waste but non-living things do not perform these functions.

4. Fill in the blanks

(cell, environment, , respond, car, Photo synthesis, nutrients,)

- 1. Building blocks of life cell.
- 2. Living things take in nutrients to get energy.
- 3. Living things **respond** to the world around them.
- 4. An environment is all the living things and nonliving things that surround an organism
- 5. People do not need car to survive.
- 6. Photosynthesis process by which plants make their own food.

5. Match the following

6. The process by which plants make food.

- Photosynthesis
- 7. What plants require to make food.
- Sunlight, Carbon dioxide, Water

8. Which gas plant gives off when it makes food?

- Oxygen

9. Parts of Plants
