Preface

The Permanent Constitution of the State of Qatar highlights education as one of the most fundamental pillars of social progress, declaring that the State shall ensure, foster and endeavour to spread education. In light of that responsibility and to fulfil the mission of the Ministry of Education and Higher Education to regulate and support high quality learning opportunities across all educational levels, the department of Curriculum and Learning Resources has developed the Common Framework for Adult Literacy Program which has guided the authors and helped construct this English Language book for adult learners.

English 2A for Adult Literacy Program is based on a communicative learner-centred approach. This methodology makes sure adult learners are actively engaged in learning and using the English language to express themselves, interact with others and discover their environment. The vocabulary and structures are carefully introduced, gradually developed and systematically revised in a building-block strategy. The four skills of the English language (listening, speaking, reading and writing) are developed in an integrated way throughout the book.

The authors hope this book would be a valuable and effective educational resource for students and teachers.

Subject Booking a family trip

Dear all,

I send you this email because we would like you to plan our family vacation for this year. We would like to travel abroad on a long trip to a country in Europe. We would not like to stay at hotels during our summer holiday. We would like to stay at apartments near local markets, restaurants and museums. My husband and son would like to eat traditional food and enjoy nature. I would like to visit museums and go shopping. Travelling abroad is a lot of pleasure for us and we would like to have a great time as a family. Can you book our flights and make the reservations? My husband would like to pay by credit card. Please write back and let us know your answer.

Thank you.
Elizabeth
