- B** How can you learn about your family's past? Write down the different ways in your notebook. Then, quickly read the text. Are your answers the same?

- B What is genealogy? ☐

## Meet the ancestors

What makes you who you are? Part of the answer is in your family's past. Become a detective and find clues to your family history.

### Word Focus

**gene:** part of a cell passed from parents to children that determines how they look

**generation:** the people of about the same age in a particular family

**ancestor:** person related to you who lived a long time ago

**genealogy:** the study of family history

1. When you look in the mirror, do you see your father's smile? Maybe you take after your mother or look like a grandparent? That's because of DNA. Our DNA contains **genes** that make each person in the world different - no two people look, think or act the same. We pass down our genes through **generations**. Scientists can test your DNA to find out which part of the world your **ancestors** were from.
2. Your family's history may be a mystery to you, but there's a way to find out about it. It's called **genealogy**, and it's the study of the people you are related to. Genealogy helps you put together your family history. It starts with the relatives you know, such as parents and grandparents, and then you can learn about ancestors who lived and died before you were born.

- D** Read the *Exam Close-up*. Then read the *Exam Task* below and underline the key words in the text.

## Exam Task

Look at the sentences below about studying your family history. Read the text to decide if each sentence is correct or incorrect. Write T (True) or F (False).

- 1 We look the way we do because of the genes in our DNA. ☐
- 2 A DNA test can show where in the world our ancestors lived. ☐
- 3 You can find out the number of relatives you have in a DNA test. ☐
- 4 Genealogy is the history of our past and present family members. ☐
- 5 Relatives who are alive could have information about ancestors. ☐
- 6 A family tree shows how you are related to other people in your family. ☐
- 7 A detective can help you to find information about your family. ☐
- 8 It is possible to buy old newspapers at some libraries. ☐
- 9 Public records tell you when people were born. ☐
- 10 The text says that websites can help you find information about your ancestors. ☐

## Exam Close-up

### Reading the exam question first

- It's a good idea to read the exam sentences very carefully before you read the text.
- Underline the key words in each statement so you know what information you need to look for.
- Then read the text quickly so you know what it is about.
- Read the text again and look for words and phrases in the text that are similar to the word you underlined in each exam sentence.
- The statements are in the same order as the information in the text.

**E** Now complete the *Exam Task*. Use the words you underlined to help you.

**F** Find the underlined words in the text and think about what they mean. Then circle the correct meanings below.

- 1 **take after**: to follow somebody / to be like somebody
- 2 **look like**: to have a similar appearance / to see things you enjoy
- 3 **pass down**: transfer to / respect the next generation
- 4 **relative**: family member / close friend
- 5 **find out**: to take outside / to discover or learn
- 6 **look for**: to be similar to / to try to find

3. It isn't difficult to learn about your past. You can begin by asking your relatives questions about your ancestors. While you are talking with family members, take notes. This helps you organise any information you get. Make sure you write down any names, dates or places people mention. Then you can draw a family tree with your name at the top. Then you would add all the relatives from you to your great grandparents so you can see how everyone is related.
4. If there are any blank boxes in your tree it's time for some detective work! Many people begin at a library where they can look for family names in old newspapers. Public records are usually a very good thing to look at too. They have information about births, marriages and death certificates too. Some records show when people moved to a country. Sometimes, records tell you where people went to school and what their job was. You can also search the Internet. With every bit of research you do, you are discovering your family's history.

## Ideas Focus

- If you could choose someone famous to be in your family, who would you choose and why?
- If you could go back in time, which one of your ancestors would you like to meet? Why? / Why not?

A diver uses cyanide to collect fish from a coral reef in the Philippines. Traders can receive a high price for reef fish in aquarium markets

## Cities Beneath the Sea

**Coral polyps** are truly the animals that helped make the world. For millions of years, tiny coral polyps have been building underwater cities. The polyps create something called **limestone** which they then live on top of. There are huge amounts of limestone under the ocean in islands and mountains. These limestone islands and mountains are called coral reefs. Some reefs are bigger than anything people have ever made. The Egyptians used it to build the Great Pyramids. We have used limestone to build many buildings, and crushed limestone is used to make **cement**.

### A Variety of Life

Living coral reefs are amazing 'cities beneath the sea' that are full of life. The reefs develop well in the warm oceans near the **Equator**. Among the world's most colourful places, coral reefs are full of brightly-coloured fish. Reef fish are an important food source for humans and many are caught for food around the world.

### The Biggest of Them All

The Great Barrier Reef, in Australia, is the largest reef in the world. It is 2,000 kilometres long. Over 400 types of coral, 1,500 species of fish and approximately 4,000 types of **mollusc** live in, on and around the reef.

Each year, thousands of visitors come to see this remarkable world beneath the waves. However, there are rules – visitors can only visit 5% of the reef. In this way, they can still enjoy the reef while it remains protected for future generations.

### Threats to Coral Reefs

In recent years, a number of dangers have threatened coral reefs and the life that depends on them. One of the biggest threats is an illegal way of fishing

## Exam Task

Read the text and questions below. For each question, choose the correct letter a, b, c or d.

  - b Just 5% of visitors are allowed to see it.

## Word Focus

**coral polyp:** a small animal that lives in the sea

**limestone:** a rock that is made of calcium carbonate

**cement:** a grey powder that is mixed with sand and water to make concrete

**Equator:** an imaginary line drawn around the middle of the earth

**mollusc:** an animal that has a soft body and is often covered with a shell

**stun:** make unconscious and unable to move for a short time

that explodes bombs in the water to kill as many fish as possible. It kills most living things and causes great damage to the reef's structure.

Fishing with an extremely dangerous chemical called cyanide is another threat to reefs, particularly in the Philippines. Fishermen put this poisonous chemical into the reef water because it **stuns** the fish and they can't move. They catch the fish easily and then sell them for big money to aquariums or restaurants. The chemical they use kills coral polyps, and causes large areas of the reef to die.

Water pollution also damages reefs. In addition, warmer water in the oceans has been causing many areas of reefs to turn white. Biologists are worried that further warming may damage coral reefs even more.

- Do you agree with protecting coral reefs from tourists? Why? / Why not?
- Which structures on earth do you think can be seen from outer space?

## Exam Close-up

### Understanding text types

- Identifying the type of texts in an exam can help you understand the information in it.
- Read the text quickly to find out what kind of text it is, e.g. a review, a notice, a letter, etc. and the type of information it has in it.
- Then read each paragraph carefully, one at a time. What is each paragraph about? What information does the writer want you to know? Try to answer these questions before you read the next paragraph.
- Use the title and any headings in the text to help you.

- 5 Which is the best summary of the text?
  - a Polyps are very important because they create the rock known as limestone, which is used to build things.
  - b The coral reefs are natural wonders that are in danger and we should do everything we can to save them.
  - c The fish from coral reefs are very beautiful and you can see them in aquariums around the world.
  - d There are many different ways to catch fish but some of them are not safe for the environment.

**F** Work in pairs. One of these statements about the Great Barrier Reef is not true. Which one do you think it is? Discuss your answers.

- 1 It is a World Heritage Site.
- 2 It is the world's largest coral reef system.
- 3 It is one of the Seven Ancient Wonders of the World.
- 4 It can be seen from outer space.

The Great Barrier Reef, Australia

### Reasons for Hope

Threats to coral reefs are serious, but there is reason to hope that they will survive. Coral reef conservation can help these tiny coral polyps, which have survived natural threats for millions of years, to rebuild the damaged reefs that so many ocean creatures and plants depend on.

### What's new?

Every day we read or hear how humans are creating climate change by burning fossil fuels in huge power stations instead of using renewable energy, such as solar power. The news is full of stories of how people are destroying natural habitats and putting animals and insects in danger of extinction.

However, there is some good news – scientists are still making new discoveries in the darkest parts of our rainforests, caves and coasts. We know of about two million species in the world, but there are probably another eight million kinds of animals and insects that we don't know about yet.

However, as scientists discover these new animals and insects, they already know there are endangered species. Many countries have set up conservation areas to create safe places for them to live and be protected from humans.

Remember that we use the Past Simple to describe actions that began and ended in the past, but we use the Present Perfect Simple to describe completed actions when we don't know or don't mention when they happened.

## Present Perfect Continuous

**C** Read the sentences. How do you think we form the negative of the Present Perfect Continuous?

### Be careful

We don't use the Present Perfect Continuous when we mention the number of times an action occurred or when we mention specific quantities. We use the Present Perfect Simple.

- You can start your letter or email using friendly greetings and questions, e.g. *Hi!, Hello, How are you? How are things? How is it going?*
- You can end in a friendly way too, e.g. *Bye, Bye for now. See you soon. Speak to you later. That's all for now. Write soon!*

Hi Alice!

How are things? It's great to hear from you. I really miss you! That's an interesting project your teacher has given you. Why don't you write about the special day we had at school a month ago? Everyone made or gave things to sell. There were cupcakes, bread, pizza, books, pictures and clothes. Our families came and we had a party. It was fantastic. We made £1,600!

We gave all the money to help protect honeybees. A lot of the natural habitat for bees has gone because people have built houses and roads on it. We need to save the bees!

Good luck with your project. Please write back and tell me about it.

Bye!

Charlotte

# Dogs in a human world

The friendship between humans and dogs possibly began 14,000 years ago. Perhaps wild dogs became interested in human rubbish, or humans took the puppies of wild dogs and trained them to be obedient pets and helpers. When humans choose the parents of dogs, they can create a wonderful variety of dogs with plenty of talents and many different looks. Here are four examples of 'a dog's life' in the human world.

### A Food sniffer dogs

Jacques is one member of the Beagle Brigade, a group of beagles that work at international airports in the United States. Their job is to smell and find illegal fruits, vegetables and other foods in luggage and mail. These foods sometimes bring insects and diseases which could be dangerous for plants and animals. The beagle calmly sits down next to anything that smells suspicious. The dog's human partner then checks for illegal foods. Why beagles? They're friendly and cute, so they don't scare people as they sniff through the crowds. More importantly, beagles have an astounding nose for food. The Beagle Brigade can find food in luggage and packages 84% of the time!

### B Treated like a queen

Some dogs live in luxury. Tiffy, a lovely Maltese, is one of these. Her owner, Nancy Jane Loewy, treats her like a queen. She carefully prepares Tiffy's meals of meat, fish, chicken and a variety of fresh vegetables. Tiffy also eats yoghurt and biscuits after dinner. Loewy's husband has a very good job and her two sons are away at university, so she has the time and money to treat Tiffy extremely well, and she truly enjoys doing it. 'I want to give her the healthiest, most wonderful life possible for as long as possible,' she says.

**D** Read the *Exam Close-up*. Then read the *Exam Task* below and underline the key words.

- 1 Wild dogs have existed for approximately 14,000 years. ☐
- 2 Humans are responsible for the different kinds of dogs in the world. ☐
- 3 All airports in the United States use beagles to check for food. ☐
- 4 Some foods are not safe because they can carry sicknesses. ☐
- 5 Tiffany eats home-cooked meals, not normal dog food. ☐
- 6 Jessie doesn't help the patients in hospital. ☐
- 7 Service dogs can do simple tasks for people who cannot walk. ☐
- 8 SAR dogs use their sense of smell to find people who are lost. ☐
- 9 Dogs that love to chase a tennis ball do not need rewards. ☐
- 10 It is possible that one day there will be no more wolves. ☐

## Exam Close-up

### Worrying about new words

- When you are reading a text, don't worry when you see vocabulary that you don't know.
- Remember that it isn't necessary for you to understand every word to find the answers to the questions.
- In your own language, when you see a new word, you can find the meaning by looking at the words around it. Do the same with English.

**E** Find the adjectives below in the text and then match them with the meanings 1–6.

dangerous   astonishing   lovely   strong   obedient   beneficial

- 1 \_\_\_\_\_: listens and does what you say
- 2 \_\_\_\_\_: not good for you
- 3 \_\_\_\_\_: can move heavy things
- 4 \_\_\_\_\_: very nice, beautiful
- 5 \_\_\_\_\_: good for you
- 6 \_\_\_\_\_: very surprising

### C Animal carers

Jessie is a whippet that visits very sick children in hospital. She shows them her love and gives the children a chance to exercise. When they feel down, Jessie makes them happy. Jessie helps patients like young Lukas Parks to stay strong during their time in hospital.

There are many different kinds of animals that help people. We train 'service dogs' to help people with **physical disabilities**. The best known service dogs are guides for the blind. But four-legged friends perform other roles too. They can learn to open and close doors, turn lights on and off, pick up objects from the floor and even pull wheelchairs.

### D Doggie detectives

Search-and-rescue (SAR) dogs use their amazing noses to find people. Hercules, an Alsatian, can smell tiny clues that people leave wherever they go. These include bacteria, small pieces of clothing and hairs.

He has found missing hikers and has searched through **rubble** after earthquakes and other disasters. SAR dogs must be **strong, obedient**, athletic and smart. Most of all, they must love to play. Trainers look for dogs that go crazy over a favourite toy, such as a tennis ball. Those dogs will do any job if the reward afterwards is playtime.

As workers or pets, dogs are certainly **beneficial** to humans in many ways. They have a special place as 'man's best friend' and this has helped dogs to survive in our world. Wolves and wild dogs have nearly disappeared from the earth, but the number of pets and working dogs continues to increase, because of their special relationship with humans.

### Ideas Focus

- Do you know anyone who has an animal helper?
- Do you think it's right to let animals work for humans? Why / Why not?

Hi Kirk,

How are you?

Guess what, we're moving house next week! Our new house is a cottage. It's really old and interesting and I like it but I'm a bit worried I won't like being in the countryside. I also don't know if there are any people my age who live nearby.

By the way, Mum says we're having a housewarming party at the end of August. Can you come?

I really hope you can - we'll need help with the music! Maybe you could bring some of your amazing collection? Do you want to be DJ?

Don't worry about making new friends. You've always been very popular. Why don't you see if there's a local football team or youth club?  
I'd love to come to your party. It will be great fun. And of course I'd love to be the DJ! I'll bring lots of different types of music so everyone can have a good time. Have you decided on a date yet?

# Survival in the Andes

On Friday, October 13, 1972, a plane that had been flying from Uruguay to Chile with 45 people on board crashed into a mountain in the Andes. How some of the passengers managed to live is one of the great survival stories.

Twenty-nine people died in the crash and in the weeks following it. On the mountain, it was freezing cold and the survivors stayed inside the crashed plane to stay warm. They had very little food and were in very great danger while they waited for a rescue team. After 11 days on the mountain, they found a small radio on the plane and they heard the news that the rescue teams had stopped searching for them. All hope was gone. They were alone and terrified.

Days became weeks. Two months after the crash, after they had waited for summer to arrive, three of the passengers, Roberto Canessa, Nando Parrado and Antonio Vizintin, left to search for help. Each man wore three pairs of socks, with a plastic bag around each foot to keep the water out, boots, four pairs of trousers and four jumpers. Many of the clothes were from the people who had died in the crash. They also took with them a large sleeping bag that they had made. Only they could save the others now.

How did these brave young men cope with the journey? None of them had climbed mountains before and it was hard. They climbed very dangerous, icy peaks, trying to reach the top of the mountain. Some days later, exhausted and cold, they reached it. They had imagined this moment for days. On the other side of the mountain, they wanted to see a valley below that would take them out of the mountains. But instead of a valley, they saw more of the same snowy peaks. Lots of them. They weren't near the end of the mountains; they were in the middle of them. What could they do now?

### Word Focus

**peak:** the top of a mountain

**exhausted:** very tired

**valley:** an area of low land between mountains, often with a river through it

**ordeal:** a very painful or difficult thing

But there was still hope. Parrado saw two low peaks about 65 kilometres away that didn't have snow on them. If they could get there, they would be out of the high Andes. But to reach the peaks, they would need to walk for more days and they didn't have enough food. But Parrado had a solution: Vizintin could return to the plane and he and Canessa would take his food. They agreed to the plan, and Canessa and Parrado continued their journey.

As they walked, the area around them slowly began to change. The men discovered a small river; the sun was warmer. After a few days of walking, the snow had disappeared completely and flowers were everywhere. 'This is the valley,' Canessa said excitedly. 'This is the way out!'

Soon, they saw a few cans on the ground and some farm animals.

## Writing: a story (2)

### Learning Focus

#### Using narrative tenses

To write stories based in the past, we use narrative tenses. The most common narrative tenses are the Past Simple, the Past Continuous, the Past Perfect Simple and the Past Perfect Continuous.

- Use the Past Simple to talk about a completed action / state in the past, a series of actions that happened one after the other in the past or to take the action of the story further.
- Use the Past Continuous to set the scene of the story and to talk about an action that was in progress in the past when another action interrupted it.
- Use the Past Perfect Simple to talk about an action that happened before the time of the narrative or another past action.
- Use the Past Perfect Continuous to talk about an action that was in progress for some time in the past which was interrupted by another past action, or which had an effect on a later event in the past.

## Reading

**A** These devices can be used to spy on people. What kind of information do you think people doing surveillance could get from these devices?

- a surveillance camera
- a video camera
- a computer
- a mobile phone
- a satnav

**B** Quickly read the text and write T (True) or F (False).

What does the text tell us about surveillance?

- 1 We are being watched all the time. ☐
- 2 It should only be used on criminals. ☐
- 3 Surveillance equipment can be more effective than people at detecting some things. ☐

The view from one of four million surveillance cameras in the United Kingdom; this one, in London, includes tiny wipers to clear the rain.

# They're watching you

In the novel 1984, which was published in 1949, British author George Orwell wrote about a time in the future when it is impossible to hide from **surveillance** by the government. In the novel, people are always reminded that the government can see them by the phrase, 'Big Brother is watching you'.

The world that Orwell predicted is already here. Video systems that watch people are now used in many cities around the world. In Paris, France, for example, there are now cameras nearly everywhere to help control traffic and approximately 2,000 cameras on city buses to prevent crime. In Britain, there are cameras that watch streets and public transport, stadiums and shopping areas. With nearly five million cameras – one camera for every 14 people – Britain has more surveillance cameras than anywhere else in Europe.

So who's watching? The police, certainly. There is nothing a criminal can say when the crime he has committed has been caught on video. For example, in 2009, 95 per cent of Scotland Yard murder cases on video surveillance as **evidence**. But even when criminals are not actually caught on video, just seeing a video camera can make an area safer. For this reason, some people put up signs that say 'Video Surveillance Is In Operation' even where there are no video cameras.

Video surveillance has also been used to save lives. One day in France, 18-year-old Jean-François LeRoy was swimming in a public swimming pool. While he was under water, he **lost consciousness**. The lifeguards who were watching the pool didn't realise

Police check cars using cameras and optical licence tag recognition in London

## Word Focus

**surveillance:** watching of a person or place

**evidence:** reasons for believing that someone is guilty of a crime

**lose consciousness:** to not be awake because of an injury

**set off:** to cause an alarm to make a sound

what was happening. LeRoy sank slowly and quietly to the bottom of the pool. Without help, he would have died in four minutes.

Although no lifeguard saw LeRoy drowning, 12 large machine eyes under the water noticed it. Nine months earlier, a surveillance system called Poseidon had been put in the pool. Poseidon can understand when swimmers are not moving normally, and it sets off an alarm for the lifeguards. Just 16 seconds after Poseidon noticed that LeRoy was sinking, the lifeguards pulled him from the pool. Poseidon had saved his life.

Although it is useful for fighting crime, many people are still concerned about public surveillance. Norman Siegel, an American lawyer, says that there has been a huge increase in video cameras in public places, but there hasn't been a lot of discussion about the advantages and disadvantages. He believes that people should vote to show if they agree or disagree with public surveillance.

Whether you agree with it or not, the fact is that we live in a world where we are surrounded by surveillance.

- 8 A sign on a house about video cameras might not be true. ☐
- 9 The Poseidon system had been working in the pool for less than a year. ☐

### CyberTracker

If you ever go (1) **on / at** safari, you may see huge herds of zebras, elephants and giraffes. But people are beginning to get concerned (2) **about / around** many species, because their natural habitat is starting to disappear and this could lead (3) **on / to** them coming (4) **into / under** threat.

Conservationists are looking (5) **for / from** answers and have turned to animal trackers for their help. Animal trackers are experts (6) **on / at** the animals which live on their land. They know what they eat and drink and where they sleep. However, there is a problem with relying (7) **on / in** them for information: they aren't always able to communicate (8) **with / from** the conservationists because they often don't read or write.

This is where technology has been helping out. Software developed by CyberTracker Conservation in Africa allows animal trackers to record their observations using pictures instead (9) **of / up** words. This makes data collection much faster, so larger amounts of high quality information are collected over a shorter period of time.

Hopefully, with new inventions like this available, we will be successful (10) **from / in** helping to save endangered species and the environments they live in.

### Love to dance?

Modern dance is a fantastic way to express yourself. There are many different kinds of modern dance and they all make you move! You'll become hot and tired in the classes, but you'll learn a lot, too. Unlike ballet, which has many rules, you can create your own style.

### BRACELETS, NECKLACES, AND MORE!

Necklaces, earrings, rings and bracelets can say a lot about you and your style. If you can't find exactly what you want in the shops, or if it's too expensive, do a course in jewellery making and create your own unique pieces. It's fun and creative.

### DO YOU HAVE WHAT IT TAKES TO SURVIVE?

If you think the summer holidays are dull, then a survival course could add some excitement to your life. The course teaches young explorers how to build a fire and put up a tent, how to climb a tree and how not to get lost in a forest.

## Writing courses near you

Do you need to work on your grammar or spelling? Are you creative? Perhaps you want to work for a newspaper one day? These are all very good reasons to do a writing course this summer. It can improve your writing skills for school or work.

What could be more fun in the boring summer school holidays than a magic course? You can learn lots of incredible tricks that will amaze and impress your friends. You will be able to make objects vanish, cut someone in half and pull a rabbit out of a hat!

## COOK GOOD FOOD

## Your Amazing Brain

A room at the Virginia Science Museum in Richmond, USA, is designed as an optical illusion – something that is not what it seems

Your brain controls everything you do. It makes it possible for you to think, learn, create and feel emotions; to blink and breathe and for your heart to beat — this fantastic control centre is your brain. It is so amazing that a famous scientist once called it 'the most complex thing we have yet discovered in our **universe**'.

Trying to make **sense** of the brain isn't easy. We know it's the organ that makes us human by giving us the ability to create art and language, make decisions and produce **rational** thought. It's also responsible for our personalities, memories, movement and how we understand the world.

Can this small grey organ, which weighs less than one and a half kilos, really do so much? Amazingly, your brain contains about 100 billion microscopic cells called **neurons** — it would take you over 3,000 years to count them all. Whenever you dream, laugh, think, see or move, it's because

- 1 Why does the writer mention computers?
  - a to compare them to the human brain
  - b to show how fast they have become

  - a send messages very slowly.

  - b the structure of your brain changes.
  - c you learn something new.
  - d you remember something.

- Read the section in the text with the same word carefully and check it is the best option.
- Remember to read all the answer options before you choose the best one.

- 4 What does the writer tell us about exercise?
  - a It can make you less intelligent.
  - b It needs a special chemical.
  - c Its effects are not well known.
  - d It can make you feel better.
- 5 What is the article generally about?
  - a All the steps that are involved when your brain learns things.
  - b What an incredible organ the human brain is.
  - c How the brain makes people smarter than computers.
  - d The things you can do to speed up your brain.

E Find these words in the text and use them to complete the definitions below.

structure mood organs sense signals

- 1 Electrical messages in the body are known as \_\_\_\_\_.
- 2 Your \_\_\_\_\_ is the way you are feeling at a certain time.
- 3 The way something is built is known as its \_\_\_\_\_.
- 4 If the meaning of something is not clear, it doesn't make \_\_\_\_\_.
- 5 The eyes, ears, nose, mouth and skin are all \_\_\_\_\_.

F Work with a partner to solve the brain teaser below. You have two minutes!

A man went for a walk. After about an hour, he came to a deep, wide river. There was no bridge. He didn't have a boat or raft, or any materials to make one. He couldn't swim. How did he get across the river?

signals are racing between these neurons. Believe it or not, the activity in your brain never stops. Your neurons create and send more messages than all the phones in the world. And although one neuron creates only a very small amount of electricity, all your neurons together can produce enough electricity to power a light bulb.

So exactly how fast does your brain work? Well, imagine this: a bee lands on your foot. Neurons in your skin send this information to your brain at a speed of more than 240 kilometres per hour. Your brain then uses other neurons to send the message back to your foot to shake the bee off quickly. These neurons can send this information at more than 320 kilometres per hour. No computer has your brain's incredible ability to cope with the amount of information coming from your eyes, ears and other sensory organs.

But how does your brain allow you to learn things that you will use in the future? The structure of your brain changes every time you have a new thought, remember

or learn something. For example, riding a bike seems impossible at first, but soon you are able to do it. How? As you practise, your brain sends 'bike riding' messages again and again. Soon, the actions are learnt and you are able to ride a bike easily from then on.

How quickly we learn things varies from person to person, but there are some things which can help us to learn faster and, surprisingly, exercise is one of them. We know that any exercise that makes your heart beat faster is great for your body and can even help improve your mood, but we know less about the effects of exercise on learning. However, scientists have recently discovered that for a period of time after you've exercised, your body produces a chemical that makes it easier for your brain to learn. So, if you're stuck on a homework problem that is too difficult to solve, go out and play a game of football, then try the problem again. You just might discover that you're able to solve it.

### Our skeleton

The human skeleton is amazing. Some of its many functions include enabling us to move, supporting and protecting our internal organs and producing blood cells.

Not surprisingly, the bones of children and young teenagers are (1) \_\_\_\_\_ than those of adults. However, babies have (2) \_\_\_\_\_ bones than adults. A baby is born with about 300 bones. As it grows, some bones join together. An adult skeleton has 206 bones and half of them are in the hands and feet. However, the foot doesn't have as (3) \_\_\_\_\_ bones as the hand; it has one less.

Bones have different shapes and functions. Some bones are flat, others are long or short and others are irregular in shape. The thighbone is the (4) \_\_\_\_\_ and strongest bone of the human skeleton, whereas the (5) \_\_\_\_\_ bone in our body is found in the ear. It is only 2.8 mm long.

## Unit 4

### 4.1 Relative Clauses: defining & non-defining

Relative clauses give more information about the subject or the object of a sentence. They are introduced by the following words (relative pronouns):

- **which** for things.  
The programme which was about guide dogs was very interesting.

- **when** for time.  
A birthday is a time when you feel a bit emotional.
- **where** for places.  
This is the house where we grew up.

### 4.2 Defining Relative Clauses

This type of relative clause gives us information that we need to be able to understand who or what the speaker is talking about. We do not use commas to separate it from the rest of the sentence. We can use **that** instead of **who** and **which** in defining relative clauses.

These are the rescue workers who/that rescued hundreds of people in the flood.

### 4.3 Non-defining Relative Clauses

This type of relative clause gives us extra information which isn't necessary to understand the meaning of the main clause. We use commas to separate it from the rest of the sentence.

His father, who is a trainer, has a great love for dogs.

### 4.4 Temporals

When we use temporals such as *when, before, after, until, once, by the time*, etc to talk about the future, we follow them with a present or a present perfect tense. We do not use them with a future tense.

After I finish my homework, I'll help you with yours.

By the time Janet arrives, the film will have finished.

We use a present perfect tense to emphasise that the first action is finished before the other one starts. We cannot use a present tense if one action has finished.

You can watch TV when you've cleared the table. (You'll clear the table first and then you'll watch TV.)

Once everyone has eaten, we'll begin. (Everyone will eat first and then we'll start.)

### 6.1 Zero Conditional: zero & first, second conditional, if

If clause	Main clause

We use the zero conditional to talk about the results of an action or situation that are always true. We can use *when* instead of *if*.

*If a football player is shown a red card, he leaves the pitch.*

**When** a football player is shown a red card, he leaves the pitch.

### 6.2 First Conditional

If clause	Main clause
present tense	<i>will</i> + bare infinitive

We use the first conditional to talk about the results of an action or situation that will probably happen now or in the future.

*If my team **wins** the match, I'll **be** thrilled!*

*If it's still **raining** later, we'll **play** indoors.*

We can use *can, could, may* or *might* in the main clause instead of *will*. We can also use an imperative.

**Note:** Some common time expressions that are often used with the Past Perfect Simple are *already, for, for a long time/ages, just, never, once, since 2007/June, so far, yet, etc.*

A light rain **had already** begun when we set out for a run.

### 7.2 Past Simple & Past Perfect Simple

In some sentences, it is clear which action happens first. In this case, we can use the Past Simple for both actions. However, when the order of events is not clear, or when we want to emphasise which action happened first, we can use the Past Perfect Simple for the first action.

We **went** to a talk and **met** a famous explorer.

He **realised** later that he **had done** a very dangerous thing.

Remember that we must use the Past Simple for both actions when one past action happens quickly after another or one is the immediate result of the other.

When the little boy **heard** the thunder, he **hid** under the bed.

## 7.3 Past Perfect Continuous

Affirmative	
I/he/she/it/we/you/they <b>had ('d) been climbing</b>

*He **had been free falling** for several seconds before he opened his parachute.*
- for actions that were in progress in the past and had an effect on a later action.  
*The hiker **had been walking** for days and collapsed just before reaching his destination.*

**Note:** Some common time expressions that are often used with the Past Perfect Continuous are *all day/night/week, for years/a long time/ages, since*. We can use *How long ...?* with the Past Perfect Continuous in questions and for (very) long in questions and negative sentences.  
*Ben **had been climbing** mountains **for years**.*  
***How long** had you **been competing** in races?*

## 7.4 Question Tags

Question tags are short questions at the end of a positive or negative sentence. They are formed with a modal or an auxiliary verb + a personal pronoun.

We usually use an affirmative question tag after a negative sentence, and a negative question tag after an affirmative sentence.

*You **haven't competed** in a marathon, **have you?***

*The athletes **are training hard**, **aren't they?***

When an affirmative sentence contains a verb in the Present Simple or the Past Simple we use *do/does, don't/doesn't* and *did/didn't* in the question tag.

*You **go swimming every day**, **don't you?***

*You **went swimming yesterday**, **didn't you?***

We use question tags when we want

- someone to agree with what we are saying.  
*It's a beautiful day, **isn't it?***
- to make sure that what we are saying is right.  
*The tennis match starts at 3 o'clock, **doesn't it?***

*Be careful, **won't you?***

***This/That is so dangerous**, **isn't it?***

***These/Those are brave men**, **aren't they?***

## 7.5 Subject & Object Questions

When *who, what, or which* asks about the subject of a question, the word order stays the same as in an affirmative sentence.

***Who survived** yesterday's climbing accident?  
(*Everyone survived.*)*

When *who, what, or which* are the object of a question, the word order changes in the question form.

***Who did** the rescue team save?  
(*They saved the captain.*)*

## 7.6 Negative Questions

We use negative questions

- to express surprise.  
*'**Didn't** Jamie **finish** the race?' 'No, he collapsed before the finish line.'*
- in exclamations.  
***Isn't** bungee jumping one of the most thrilling extreme sports?*
- when we expect the listener to agree with us.  
***Wasn't** that such an interesting documentary?*

To answer negative questions we just use a Yes or No answer depending on what we think. A Yes answer confirms a positive opinion, whereas a No answer confirms a negative opinion.

***Isn't it** a lovely day today?*

*Yes. / **Yes**, it **is**. (=agreement)*

***No**. / **No**, it **isn't**. (=disagreement)*

# Unit 8

*He **can make** beautiful things out of stone.*

- for requests.

***Can** we go to the concert tonight?*

- for permission.

*People **can enter** this cave and explore if they like.*

We use *can't* + bare infinitive to show that we are sure that something isn't true.

***That can't be Jane!** **Isn't she** away on a trip?*

We use *could* + bare infinitive

- to talk about general ability in the past. (past form of *can*)

*I **could ski** when I was only seven years old.*

- to talk about possibility.

*We **could go sailing** if the wind went down by tomorrow.*

- for polite requests.

***Could you please give me** that magazine?*

- to make suggestions.

*We **could go** to the cinema.*

## 8.2 May & Might

*I **may** take up painting as a hobby next month.*
- for polite requests. (with *I* and *we*)  
***May** we borrow your camera?*

*You **may** ask me any question you like.*

We use *might* + bare infinitive

- to talk about possibility in the future.  
*Sue **might** decide to join a gym soon.*
- as the past tense of *may*.

## 8.3 Must

We use *must* + bare infinitive to

- say that something is necessary.  
*I **must** be home at 7 o'clock at the latest.*
- talk about obligations.  
*You **must** wear a helmet when riding a motorbike in this country.*
- show that we are sure that something is true.  
*My sister **must** be nervous about the dance competition.*
- recommend something.  
*You really **must** go and see that play! It was great!*

We use *mustn't* + bare infinitive to talk about something that is not allowed.

People **mustn't** speak on their mobiles while driving.

## 8.4 Should

We use *should* + bare infinitive to

- give advice.  
*People of all ages **should** take some exercise every week.*
- ask for advice.  
*What **should** I do about losing weight?*

**Note:** *Ought to* can also be used to give advice, but it is not usually used in the question form.

## 8.5 Would

We use *would* + bare infinitive for

- actions that we did regularly in the past, but that we don't do now.  
*I **would** always go for a run in the morning before I started work.*
- polite requests.  
***Would** you please buy some batteries for my camera?*

## 8.6 Needn't

We use *needn't* + bare infinitive to say that something is not necessary. We don't use it in affirmative sentences.  
*You **needn't** take photos at the party because my brother is videotaping it.*

**Note:** We can also use *need* as an ordinary verb. It has affirmative, negative and question forms and it is usually used in the Present Simple and the Past Simple. It is followed by a full infinitive.

Mary **needs to find** a new hobby.  
The twins **didn't need to walk** to the cinema because their mum took them in the car.  
***Did he need to pay** to join the chess club?*

## 8.7 Be Able To

We use *be able to* to talk about

- ability.  
*I **will be able to** play the guitar tonight.*
- a specific ability in the past. (*Could* cannot be used here.)  
*She **wasn't able to** practise the new dance at the weekend.*

## 8.8 Have To

We use *have to* to

- say that something is necessary.

- talk about obligation.  
*We **have to** have some training before we can go parachuting.*

## 8.9 Mustn't & Don't Have To

There is an important difference between *mustn't* and *don't have to*. We use *mustn't* to say that something is not allowed, whereas we use *don't have to* to show that there is no obligation or necessity.

*In basketball, players **mustn't** kick the ball.*

*You **don't have to** play basketball with us this afternoon if you don't want to.*

# Unit 9

## 9.1 The Passive Voice: Tenses

We use the passive voice when

- the action is more important than who or what is responsible for it (the agent).  
*Two people **were injured** during the robbery.*
- we don't know the agent, or it is not important.  
*You can use the computer now. It **was repaired** yesterday.*

The passive is formed with the verb *be* and a past participle. Notice how the active verb forms change to passive verb forms.

Tense	Active	Passive
Present Simple	take/takes	am/are/is taken
Present Continuous	am/are/is taking	am/are/is being taken
Past Simple	took	was/were taken
Past Continuous	was/were taking	was/were being taken
Present Perfect Simple	have/has taken	have/has been taken
Past Perfect Simple	had taken	had been taken
Future Simple	will take	will be taken

**Note:** There is no passive form for Future Continuous, Present Perfect Continuous and Past Perfect Continuous.

We change an active sentence into a passive sentence in the following way:

The object of the verb in the active sentence becomes the subject of the verb in the passive sentence. The verb *be* is used in the same tense of the main verb in the active sentence, together with the past participle of the main verb in the active sentence.

# Grammar Reference

*They are watching us! We are being watched!*

In this example, we do not know who is watching us and it is not very important, so we do not include the word *they* in the passive sentence.

**Note:** When we want to change a sentence with two objects into the passive voice, one becomes the subject of the passive sentence and the other one remains an object. Which object we choose depends on what we want to emphasise. If the personal object remains an object in the passive sentence, then we have to use a suitable preposition (*to, for, etc.*).

*He gave me a video camera.*

*I was given a video camera.*

*A video camera was given to me.*

## 9.2 By & With

Sometimes it is important to mention the agent (who or what is responsible for the action) in a passive sentence. We use the word *by* before the agent to do this.

*Alexander Graham Bell invented the telephone.*

*The telephone was invented by Alexander Graham Bell.*

Sometimes we want to mention a tool or material in the passive sentence. We use the word *with* to do this.

*The window was broken with a rock.*

*The room was painted with a new kind of paint.*

## 9.3 The Passive Voice: Gerunds, Infinitives & Modals

Tense	Active	Passive
Modal	can take	can be taken
Gerund	taking	being taken
Bare Infinitive	take	be taken
Full Infinitive	to take	to be taken

*Surveillance cameras should be installed here to prevent crimes.*

*He avoided being recognised by wearing dark glasses.*

*The project had better be finished by tomorrow.*

*The battery needs to be recharged.*

- We can leave out *that*.

- The following tenses and words don't change in Reported Speech: Past Perfect Simple, Past Perfect Continuous, *would, could, might, should, ought to, used to, had better, mustn't* and *must* when they refer to deduction.

## 10.2 Say & Tell

We often use the verbs *say* and *tell* in reported speech. We follow *tell* with an object.

*Julia said they would love her new single.*

*Julia told her friends they would love her new single.*

## 10.3 Reported Speech: Change in time & place

<b>here</b>	<b>there</b>
'Your CDs are <b>here</b> on the table,' she said.	She said my CDs were <b>there</b> on the table.

## 10.4 Reported Speech: Questions

When we report questions, changes in tenses, pronouns, possessive adjectives, time and place are the same as in reported statements. In reported questions, the verb follows the subject as in ordinary statements and we do not use question marks.

When a direct question has a question word, we use this word in the reported question.

'**When** did you start making records?' he asked.  
He asked **when** I had started making records.

When a direct question does not have a question word, we use *if* or *whether* in the reported question.

'Do you like classical music?' he asked.  
He asked **if/whether** I liked classical music.

## 10.5 Reported Speech: Commands

When we report commands, we usually use *tell* + object + full infinitive.

'Turn the volume down!' he shouted at me.

He **told me to turn** the volume down.

'Don't take my MP3 player!' he said to his sister.

He **told his sister not to take** his MP3 player.

## 10.6 Reported Speech: Requests

When we report a request, we usually use *ask* + object + full infinitive.

'Can you lend me your headphones, please?' she asked.

She **asked me to lend** her my headphones.

(Also: She asked if I could lend her my headphones.)

'Please don't tell anyone,' he said.

He **asked us not to tell** anyone.

# Unit 11

## 11.1 Causative

We use the causative

- to say that someone has arranged for somebody to do something for them.

*John is having his new computer delivered in the morning.*

- to say that something unpleasant happened to someone.

*Mrs Temp has had her car broken into.*

We form the causative with *have* + object + past participle. It can be used in a variety of tenses.

*I was having my kitchen painted last weekend.*

*Aunt Maureen has been having her clothes made for her for years.*

*The school has its rubbish collected every day.*

**Note:** We can also use *get* + object + past participle. This structure is less formal.

*Joseph got his mobile phone taken away in English yesterday!*

## 11.2 Gerunds

We form gerunds with verbs and the -ing ending. We can use gerunds

- as nouns.

*Swimming is my favourite hobby.*

*Ben likes cycling.*

- after prepositions.

*Jenny's only five but she's very good at reading.*

- after the verb *go* when we talk about activities.

*My class are going canoeing at the weekend.*

We also use gerunds after certain verbs and phrases.

admit	finish	love
avoid	forgive	miss
be used to	hate	practise
can't help	have difficulty	prefer
can't stand	imagine	prevent
deny	involve	regret
dislike	it's no good	risk
(don't) mind	it's no use	spend time
enjoy	it's (not) worth	suggest
fancy	keep	
feel like	like	

*Some students are having difficulty doing their maths exercises.*

## 11.3 Infinitives

	Active	Passive

The teacher threatened **to expel** the badly behaved student.

Photos can **be edited** on a computer.

You should **have tried** harder to pass your exams.

He should **have been awarded** a prize.

## 11.4 Full Infinitives

We form full infinitives with **to** and the verb. We use full infinitives

- to explain purpose.  
They went to the library **to look up** information for their project.
- after adjectives such as *afraid, scared, happy, glad, sad*, etc.  
Jenny was **so happy to pass** her exams.
- after the words *too* and *enough*.  
It was **too late to change** his mind about his studies.  
His grades weren't **good enough for him to go to** university.

We also use full infinitives after certain verbs and phrases.

afford	fail	prepare
agree	forget	pretend
allow	hope	promise
appear	invite	refuse
arrange	learn	seem
ask	manage	start
begin	need	want
choose	offer	would like
decide	persuade	
expect	plan	

The teacher **offered to give** the weak student some extra help with maths.

## 11.5 Bare Infinitives

We use bare infinitives after

- modal verbs.  
You **should ask** your teacher for advice on your studies.
- had better* to give advice.  
You'd **better be careful** when you go mountain climbing.
- would rather* to talk about preference. We often use the word *than*.  
I'd **rather stay** at home than go out tonight.

## 11.6 Gerund or Infinitive?

Some verbs can be followed by a gerund or a full infinitive with no change in meaning. Some common verbs are *begin, bother, continue, hate, like, love* and *start*.

The students started **writing/to write** the test at 9 o'clock.

John failed the test because he didn't **bother revising/to revise**.

Mr Cairn continued **teaching/to teach** until he was 70 years old.

Young children love **learning/to learn** new things.

Don't start **running/to run** until you hear the whistle.

There are other verbs that can be followed by a gerund or a full infinitive, but the meaning changes. Some common ones are *regret, forget, go on, remember, stop* and *try*.

I **regret studying** French at university. (I studied French, but now I wish I hadn't.)

I **regret to tell** you that I've lost my maths book. (I'm sorry that I have to give you this news.)

Paul **forgot meeting** Belinda and walked straight passed her this morning! (He didn't remember that he had met Belinda, and he didn't recognise her when he saw her this morning.)

Paul **forgot to revise** for his test, and he failed. (Paul didn't remember he had a test and so he didn't revise for it.)

If you're doing a test, **try to answer** all the questions. (You might not be able to answer them all.)

# Unit 12

## 12.1 Ordering Adjectives

Sometimes more than one adjective is used in front of a noun:

She was a **nice, old** woman.

He has a **large, black, leather** sofa.

## Opinion adjectives

Some adjectives give a general opinion, which describe almost any noun:

He's a **nice** boy.

She's a **good** student.

They're **wonderful** parents.

However, some adjectives give a specific opinion to describe particular kinds of nouns:

**tasty** meal, **comfortable** bed, **intelligent** child

Usually a general opinion adjective is placed **before** a specific noun:

a **nice, tasty** meal

a **beautiful, comfortable** bed

a **lovely, intelligent** child

When we use two or more adjectives to describe something or someone, we usually put them in a certain order. Notice the correct order.

NOUN	general opinion	nice	beautiful	strong
	size	small	large	big
	age	old	new	ancient
	shape	round	oval	long
	colour	pink	beige	white
	nationality	French	Italian	Japanese
	material	cotton	wooden	silk

She has **beautiful long brown** hair.

He usually wears an **awful green woollen** jumper at the weekend.

They live in a **huge old English** cottage.

## 12.2 Adjectives ending in -ed & -ing

Adjectives that end in -ed describe how someone feels whereas adjectives that end in -ing describe a person, place or thing.

He's **interested** in the human body and he wants to be a doctor.

This book on the human body is very **interesting**.

## 12.3 Types of Adverbs

There are adverbs of frequency, manner, time, place and degree.

- Adverbs of frequency answer the question *How often?*  
They see each other **regularly**.

- Adverbs of manner answer the question *How?*  
She sings so **beautifully**.

- Adverbs of time answer the question *When?*  
Tom broke his leg **yesterday**.

- Adverbs of place answer the question *Where?*  
There is a great supermarket **near** my house.

- Adverbs of degree answer the question *To what extent?*

It's **rather** difficult to think when there is a lot of noise around you.

## 12.4 Order of Adverbs (manner, place & time)

When we use two or more adverbs in a sentence, the usual order is **manner + place + time**.

He put the envelope **carefully into his pocket after the meeting**.

After verbs like *come, leave, go*, etc, the usual order is **place + manner + time**.

She went to **the dentist quickly after work**.

Time adverbs can also come at the beginning of a sentence.

**After the meeting** he put the envelope carefully into his pocket.

**After work** she went to the dentist quickly.

## 12.5 Order of Adverbs (degree & frequency)

Adverbs of degree such as *quite, rather, too* and *very* usually come before an adjective.

He is **quite** good at maths.

The film was **rather** scary.

She is **too** young to see that film.

His mother is a **very** talented musician.

*Enough* is also an adverb of degree, but it comes after an adjective or a verb.

The film wasn't good **enough** to win an oscar.

She earns **enough** to afford a new car every two years.

Adverbs of frequency such as *always, never, seldom*, etc usually come after the verb *be* but before the main verb.

(See also 1.2 on page 161.)

She **always** brushes her teeth in the morning and at night.

He **seldom** eats sweets.

## 12.6 So & Such

We use *so* and *such* for emphasis. They are stronger than *very*.

- We use *so* + adjective/adverb.

This course is **so interesting!** I am really enjoying it!

- We use *such* + (adjective) + noun.

Her brother is **such a clever boy!**

We can also use *so* and *such* to emphasise characteristics that lead to a certain result or action.

It was **such an interesting book** that I read it twice.

The film was **so bad** that I left the cinema half way through.

## 12.7 Comparison of Adjectives & Adverbs

We use the comparative to compare two people or things. We usually form the comparative by adding -er to an adjective or adverb. If the adjective or adverb has two or more syllables, we use the word *more*. We often use the word *than* after the comparative.

Judy has got **longer** hair than me.

This black dress is **more expensive** than the white one.

We use the superlative to compare one person or thing with other people or things of the same type. We usually form the superlative by adding -est to the adjective or adverb. If the adjective or adverb has two or more syllables, we usually use the word *most*. We use the word *the* before the superlative.

You are **the best** friend I've ever had.

He is **the most intelligent** person I have ever met.

**Spelling:** big → bigger/biggest, nice → nicer/nicest, brave → braver/bravest, tidy → tidier/tidiest

Some adjectives and adverbs are irregular and form their comparative and superlative in different ways.

Adjective/Adverb	Comparative	Superlative
good/well	better	the best
bad/badly	worse	the worst
many	more	the most
much	more	the most
little	less	the least
far	farther/further	the farthest/ furthest

## 12.8 Other comparative structures

We use *as* + adjective/adverb + *as* to show that two people or things are similar in some way.

My computer is **as fast as** your laptop.

We use *not as/so ... as* to show that one person or thing has less of a quality than another.

I am **not as successful as** my brother is.
