GoGetter for students

GoGetter is a new four-level English course for upper primary and lower secondary children, taking them from an A1 to B1 level of English. Students in this age range are in a transitional period between childhood and their teens and are still developing intellectually and emotionally. They live in a fast moving, very dynamic world governed by new technologies. Each level of the GoGetter series has been carefully tailored to the modern student's cognitive needs and has been designed to create an enjoyable and engaging environment for effective learning. Multimedia teaching and learning tools offer teachers and students a wide range of options for the classroom and home. They include videos, animations and exciting digital content on MyEnglishLab, Extra Online Practice and ActiveTeach activities.

GoGetter for teachers

GoGetter has been created on the basis of tried and tested methodology for effective teaching. It builds on existing EFL methods adapted to the reality of today. A variety of language presentation context and very rich multimedia content will help keep students engaged and motivated. Seamlessly integrated exam preparation, an online gradebook in MyEnglishLab and a unique assessment package will help your students get great results and prepare for future exams.

GoGetter has also been created with busy teachers in mind. Teaching with GoGetter will require minimal preparation time due to the open-and-teach formula in the Students' Book and at-a-glance organisation of materials within the Teacher's Book

Features of the course

Grammar

Grammar is clearly presented in a scaffolded, step-by-step approach with two contextualised grammar presentations per unit: a photo story with teenage characters, which is also available as a video, in Lesson 2, and a cartoon in Lesson 3. Grammar boxes contain clear, student-friendly examples of the target structures and provide a reference point for students as they learn and practise. Get Grammar! animations support every grammar lesson. The likeable, captivating characters make learning grammar fun! Further consolidation practice is available in the Workbook.

Vocabulary

Each unit starts with and eye-catching visual presentation of vocabulary, which gets students' attention right from the start. It is followed by step-by-step engaging practice. As well as appealing to students, vocabulary sets reflect typical exam topic areas. The I know that! feature at the start of the unit allows for quick revision of lexical items students are very likely to know from previous school years, which is a great confidence-booster. I remember that! activities engage students, as they are personalised and effectively help students remember new words. Each Students' Book page has a corresponding Workbook page allowing for lots of additional practice. Finally, there is a Word blog in the Workbook at the end of every unit that consolidates the vocabulary of the unit.

Skills

There are separate skills lessons that also take step-by-step approach:

Communication lessons: using videos or audio material, dialogues are modelled and brought to life, which encourages students to use natural English in their own dialogues.

Reading lessons: engaging and age-appropriate texts in different genres motivate and inspire students.

Listening and Writing lessons: students need to use their critical thinking skills in order to complete the listening comprehension activities. GoGetter provides clear writing models to help students write their own text on the same topic.

A lot of support, such as prompts, dialogue frames to fill in etc., is provided in free speaking and writing tasks.

There are also four *Skills Revision* sections in each level that consolidate skills work from each two units.

Motivating content

GoGetter offers a great variety of context and teaching modes. Language is presented through real life dialogues, videos, cartoons, animations and exciting reading texts and audio material. The topics are all up-to-date and were carefully chosen to appeal to the age-groups concerned.

Each level of GoGetter contains four fascinating Get Culture! lessons with authentic BBC video content that takes students on an world wide journey, opening their eyes to different parts of the English-speaking world and motivating them to find out more.

Multimedia content

GoGetter is a fully blended course with exciting digital and video content that will engage your students. They will really look forward to their lessons! Every student who uses the print Workbook has access to additional language practice through Extra Online Practice (for more information, see page 7). If you do not have easy access to a classroom computer or a projector, you can still run successful lessons as the material has been designed in such a way that you can use print and audio material only.

Content and Language Integrated Learning (CLIL)

There are four CLIL sections in GoGetter 2. They are titled: Get more on Science!, Get more on Geometry!, Get more on Art! and Get more on History! These lessons are included in the Workbook and ActiveTeach and they are designed be used in class or can be assigned for homework. They teach students practical language connected to a wide range of subjects that they will be learning about in their native language at the same time. There are four CLIL sections per level.

Support for mixed ability classes

GoGetter supports teachers who work with mixed-ability classes in a number of ways. The Teacher's Book includes teaching tips for mixed ability classes, as well as extra worksheets for grammar, vocabulary and communication lessons. In the Workbook challenging activities are labelled with an asterisk, which makes it easier for the teacher to assign homework to students at different language level.

The Global Scale of English (GSE) is a standardised, granular scale which measures English language proficiency. Unlike some other frameworks which describe attainment in broad bands, the Global Scale of English identifies what a learner can do at each point on the scale across speaking, listening, reading and writing skills.

The scale is designed to motivate learners by giving a more granular insight into the learning progress. Teachers can use the Global Scale of English to match a student to the right course materials for their exact level and learning goals.

The badging on the back of your coursebook shows the range of objectives that are covered within the content. Knowing this range helps you select course materials with the right level of support and challenge for your students to help them progress. It does not mean that students need to have mastered all the objectives below the range before starting the course, or that they will all be 'at' the top of the range by the end.

For more information about how using the GSE can support your planning and teaching, your assessment of your learners, and in selecting or creating additional materials to supplement your core programme, please go to www.english.com/gse.

Exam preparation

The table below shows the correlation between the language level of each part of *GoGetter* series and the requirements for Pearson Test of English and Cambridge exams.

GoGetter 1	<a1 a1<="" th=""><th>17-29</th><th>YL Springboard</th><th>YLE Starters</th></a1>	17-29	YL Springboard	YLE Starters

GoGetter 3	A2/A2+	33-41	YL Bréakthrough	YLE Flyers
GoGetter 4	A2+/B1	38-46	General Level 1	Key for Schools

The GoGetter course provides a lot of opportunities for students to get acquainted with the formats of the Pearson Test of English for Young Learners and Cambridge English: Young Learners tests. In every unit of the Students' Book there are exercises flagged Exam Spot which help students to prepare for the exams. Skills Revision sections in the Students' Book and Workbook enable students to regularly check their progress through exam-style exercises. Additionally, the Skills Revision section in the Students' Book includes an Exam Language Bank, collating key language from the unit. There is an Exam Practice section in the Workbook, which provides additional exam practice. The assessment package includes two exam-style tests for those students who are preparing for PTEYL or CYLET.

21st century skills

Today's learners require materials that will help them develop skills they need to survive and succeed in the rapidly changing world. They need to be challenged and inspired by their learning. They also need to learn how to work with peers, using modern technologies they are familiar with and enjoy. GoGetter helps develop not just English language skills, grammar and vocabulary, but also all those skills modern learners need to build to become fully rounded citizens of the global community.

The key skills focused on in GoGetter are: Communication, Collaboration, Creativity, Cultural Awareness, Critical Thinking, Digital Literacy, Assessment for Learning and Autonomy.

Communication, **Collaboration and Creativity:** There are a lot of pairwork and groupwork activities integrated in the core lessons in each unit. Project work at the end of *Get Culture!* lessons involves team work so students can learn how to collaborate with peers in order to successfully complete a task.

Cultural Awareness: In an increasingly globalised world, it is important that students gain an understanding of different cultures through the medium of English. *Get Culture!* lessons and exciting videos provide students with a wider perspective of cultural aspects. They also provide an opportunity to compare a foreign culture to their own.

Critical Thinking: Problem solving and reasoning skills are developed throughout the course, especially via the reading and listening activities. These activities are flagged in the teaching notes in every lesson. Interactive cliff-hanger endings in the video story create a great opportunity to analyse and predict

Autonomy and Personal Initiative: Get Culture! sections end with project work which requires some simple data collating or research in order to complete the task. Students are also encouraged to present their own view on the topic from the lesson

Students are prompted to reflect on and take responsibility for their own progress through the regular Self-assessment sections in the Students' Book and Workbook.

Assessment for Learning: see page 8 for more information.

Digital Literacy: In Get Culture! lessons students are encouraged to create their own projects such as presentations, photo albums, leaflets or even mini videos. Photocopiable project worksheets (in the Teacher's Book) provide step-bystep guidelines on how to complete the tasks.

Extra Online Practice or the online Workbook on MyEnglishLab enable students to practise what they have learnt in a digital environment.

GoGetter for your classroom

There are many different ways to teach English. Your choice will be influenced by your specific teaching context and preferred teaching style; the number of students in your class; their level and background (the school or Ministry requirements) and access to broadband internet in class, amongst other reasons. *GoGetter* content was designed so you can easily adapt it to your own unique situation. Here are a few possible ways to access the comprehensive set of *GoGetter* materials:

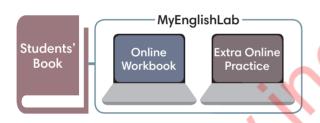

CLASSIC

The classic option is recommended for teachers who prefer to use the printed version of the Students' Book in class and would like their students to do their Workbook homework on paper in the Workbook itself. If students have access to the internet at home or on their own mobile devices, they can access Extra Online Practice (powered by MyEnglishLab) and do additional language exercises in digital format. To access the Extra Online Practice activities, they will need to use the code printed on the inside cover of their Workbook.

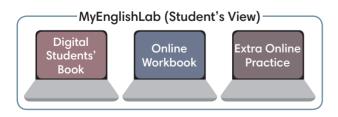

If teachers have access to a computer with a projector or an interactive white board in the classroom, they can also use ActiveTeach for front of class presentation of the Students' Book and Workbook materials. They will also find all the coursebook audio material and videos on ActiveTeach. For classrooms with DVD and CD players, teachers can use the Teacher's DVD ROM and Class Audio CDs.

BLENDED

This solution is recommended for teachers who would prefer their students to do their Workbook homework in the online digital Workbook accessed from MyEnglishLab. Their work will be automatically corrected and reported to the teacher. Additional content and the complete coursebook video material can be accessed in Extra Online Practice. In this option the teacher can assign the class all the content available online from their account on MyEnglishLab. Teachers can also use the ActiveTeach either with an interactive whiteboard or from their laptop with a projector. For classrooms with DVD and CD players, teachers can use the Teacher's DVD ROM and Class Audio CDs.

DIGITAL

In fully digital classrooms, where students have their own tablets or computers, *GoGetter* can be used in a fully digital configuration. Students can use the digital Students' Book in the classroom and do all their homework online on MyEnglishLab, where they will find all the Workbook activities and also Extra Online Practice. Workbook and Extra Online Practice content can be assigned by the teacher from their account on MyEnglishLab.

Teachers can use the ActiveTeach either with an interactive whiteboard or from their laptop with a projector. There they will find all the Students' Book and Workbook pages with interactive exercises, as well as all the course audio material and videos.

How to access Extra Online Practice

Extra Online Practice can be accessed through the MyEnglishLab platform by both the student and the teacher. The access codes are provided in the course materials. The table below shows where to find relevant codes and what content they activate.

How to work with Extra Online Practice in different classroom settings

- If your students are using online Workbooks with Extra Online Practice (both powered by MyEnglishLab), you will be able to assign all the online activities and monitor the performance of your students in an online gradebook.
- If your students are using printed Workbooks and therefore only have access to Extra Online Practice on MyEnglishLab, you will have to tell them which exercises from Extra Online Practice you want them to do. You cannot monitor students' performance in an online gradebook in this configuration.

How to register your Extra Online Practice access code

To register go to www.myenglishlab.com and click Register. Follow the instructions on the screen.

Assessment for Learning (AFL)

Traditionally, assessment aims to find out what students already know in order to diagnose what their linguistic proficiency is. Thanks to assessment procedures, teachers can monitor the progress students make and prepare them for tests which in many countries await students at the end of their respective educational stage. What is more, the results of assessment procedures provide information for students and their parents about their progress in learning; information to teachers about the effectiveness of their teaching and school management about the efficacy of their teachers. There are two main types of assessment: formative and summative.

Formative assessment refers to the strategies and procedures used by teachers during the students' learning process in order to provide the teachers with feedback. Teachers can use this information to modify teaching and learning activities where necessary, keeping up student motivation levels and maximising attainment. Summative assessment, on the other hand, is usually administered at the end of a teaching period to find out whether the progress students made is very good, good, satisfactory or unsatisfactory. Formative assessment

is often described as Assessment for Learning rather than assessment of learning. The lists below present the main differences between formative and summative assessment.

Assessment for Learning (formative)

- · while teaching
- continuous
- aim: to observe student's progress and his/her strengths and weaknesses, to provide constructive feedback
- students' intrinsic motivation: to achieve success/selffulfilment
- feedback: information about how to improve performance (usually expressed in a descriptive way, orally or in writing)

Assessment of learning (summative)

- after teaching (usually in the form of tests)
- periodical
- aim: to evaluate student's progress, to give grades
- students' instrumental motivation: to be rewarded or to avoid being punished
- feedback: information about student's results (usually expressed in grades)

Main strategies of formative assessment

The main strategies of formative assessment enable students to focus better and make it easier for them to understand what learning is about. Each student is more involved in the process of learning and invited to answer three questions which are important for their education:

- 1 Where am I going?, i.e. What am I going to learn?
- 2 Where am I now?, i.e. Can I do what is expected of me? Am I on the right track?
- 3 How can I get better?

The strategies of formative assessment refer to all three stages listed above. The table below presents the most useful techniques that teachers might consider using during English lessons.

Strategies of formative assessment

SETTING AIMS and CRITERIA FOR SUCCESS

At the beginning of each lesson, students are informed about the learning objectives. The teacher tells them what they are going to learn, why they are going to learn it, and then makes it clear what the required standards of good work are.

Recommended techniques used for formative assessment

- Lesson objectives presentation: The teacher explains lesson aims in a way appropriate to students' linguistic and cognitive development. Brief lesson objectives are written on board.
- **What Am I Looking For?' (WILF):** The teacher draws students' attention to the most important elements in the lesson and provides examples of model work.

MONITORING STUDENTS' LEARNING

The teacher observes how students participate in classes during pairwork or groupwork, assesses their written work, evaluates project work or oral tasks. The data, which is collected regularly, enables the teacher to give feedback to each student.

GIVING CONSTRUCTIVE FEEDBACK

is a kind of a dialogue between the student and the teacher which aims at helping the student to find his/her best way of learning. The teacher first accentuates the positive aspects of a student's work and then tells him/her what he/she should improve on and eventually what he/she should focus on in order to get better.

As students are discouraged to volunteer, in order to encourage them all to answer the teacher's questions, there are the following techniques that can be used instead:

- Lollipop stick technique: students write their names on lollipop sticks and put them in a cup. Teacher asks one student to pick a stick and a student whose name is on the stick responds to a question.
- ABC, True/False, Yes/No, Stop/Go, @/@/® response cards to monitor whether all students can understand the different exercises and questions and keep up with the lesson. Each student has his/her own set of cards to choose from.
- Traffic Lights Cards: students show 'Green' if they know how to do an exercise or understand the topic, 'Yellow' when they need some help, and 'Red' when they need re-teaching the language point.
- Thumbs up/down technique: teacher asks students to make a thumbs up/down gesture to get feedback on what's correct/true/false etc.
- Basketball technique: a student gives the answer, then throws a ball to another student to give his/her answer and so on. The teacher only gives feedback after all the students involved have spoken.
- **Observation form:** teacher collects data about students' work by filling observation forms or reading written assignments to adjust teaching procedures where necessary.
- Stand up and change places: students stand up and change places if they agree with the statement teacher reads out about the lesson. Students can explain why they agree or disagree.

PEER LEARNING

Working together in pairs or groups, completing cooperative teaching-learning tasks and peer assessment gives students opportunity to share knowledge and learn how to be more attentive and objective.

- Think-pair-share: students first individually think of the answer to a question, then discuss their ideas in pairs and eventually pairs present their ideas to a group or a class. Students can express their ideas and consider those of others.
- Pairwork/Groupwork: students 'study' each other's work and do tasks specified by the teacher.
- Two stars and a wish: students identify two positive aspects of the work of a peer and express a wish about what the peer might do next time to improve their work.
- Expert Envoy: individual students are 'experts' who share their knowledge and understanding with pairs or groups. Choose strong students to help others.

INDEPENDENT LEARNING

This strategy is based on a number of reflective questions which promote autonomous, more independent learning. Students need to be aware of their aims and be convinced that they truly have an influence on what and how they learn. They need to know that the teacher appreciates their involvement and efforts. Gradually, students take more responsibility for the progress they make and for the pace of their learning.

- Summative questions: at the end of a unit, module or lesson students are encouraged to think about the lesson, revise what was being taught and reflect on their successes and difficulties. They can be given a number of sentences to finish, e.g. Today I have learned ..., I can ..., I am good at ..., I haven't managed ..., I don't understand ..., I have difficulty in ...
- Thought-provoking questions: students gradually develop autonomy in learning by answering such questions as How successful is my learning? How am I learning it? How can I improve? What are we going to do next? What would I like to learn next?
- Three facts and a fib: students write three facts and one fib about the topic of the lesson and share them in pairs, groups or with the class. Then they try to indentify the 'fib'.
- Learning diary: the teacher can ask students to write down their questions and make notes about their learning in special notebooks.
- **Portfolio:** a collection of student work and related material which presents a student's activities, achievements, self-evaluation and reflection.

Assessment for Learning in GoGetter

Assessment for Learning techniques are clearly presented in all components of GoGetter. The table below shows how each component of the course helps to put these strategies into practice.

	Setting aims/criteria for success	Monitoring/Giving feedback	Peer learning	☐ Independent learning
Students' Book	Unit and lesson objectives are specified in a simple and straightforward way. Model texts, plans, prompts and examples show students what they are expected to produce in each exercise.	Variety of contexts and exercises (e.g. videos, animations, games, role-plays etc.) gives teacher opportunity to monitor students' progress in a lot of different ways.	Communicative games at the end of the lessons encourage peer feedback and correction. Projects are a great way to introduce peer assessment.	I know that! and I remember that! exercises help students check what they know and what they are expected to learn. Projects give students opportunity to take responsibility for their work. Exam Language Banks show students the most important language required at tests. Check yourself! boxes encourage students to reflect on their learning.
Workbook with Extra Online Practice	Examples, grammar tables and model answers provide useful information on what students should produce in each exercise.			Check yourself!, Skills Revision and Exam Practice sections give students opportunity to check their progress and assess themselves regularly. Extra Online Practice allows students to check their progress after every unit.
MyEnglishLab		The teacher can monitor students' progress and find out if certain language points need re-teaching or more practice.		Instant feedback and possibility for students to monitor their own progress develop students independence and responsibility for their work. Remediation activities help students improve when they have problems with grammar.
Active Teach	It is a great tool to get students' focus at the start of the lesson to set aims and inform about the expected outcomes.	Possibility to display the answers, audio and video scripts opens more ways for teacher to provide feedback.	Displaying the answers on IWB makes peer correction easier.

GoGetter videos

ached to the Teacher's Book

There are three types of videos in GoGetter. All of the videos are available on the DVD-Rom attached to the Teacher's Book, on ActiveTeach and MyEnglishLab. There are 45 videos per level!

Grammar and Communication videos

A specially shot, entertaining soap-opera-type drama about a group of pre-teens, their families and friends. The video presents the key language of the lesson for one of the Grammar lessons in each unit and each Communication lesson. Real-life dialogues provide natural and memorable language models.

The purpose of this video is to present the target language of the lesson that is truly engaging and meaningful. When new language is backed-up by visual clues and context (the location, the action, the body language and facial expression), it transforms the learning experience so that language is 'acquired' (in the long-term memory) rather than merely 'learnt' (in the short-term memory). This will improve students' receptive accuracy. Interactive cliff-hanger endings in the grammar videos engage students in prediction activities and encourage critical thinking.

All the video episodes are also available in audio-only format on the Class Audio CDs for those classrooms where video is not readily available. Students can access the videos on Extra Online Practice where they can also do extra comprehension and practice exercises.

Get Grammar! animations

These are funny animated clips about the adventures of Hammy, a cute hamster, and his friends Max and Anna. The video presents the key grammar structures taught in each Grammar lesson. It is divided into two parts – a short scene from Hammy's life and a Look and Learn! section presenting the key grammar structures.

The animations provide a great opportunity for the teacher to explain new grammar structures in an entertaining and meaningful way that will motivate students and get their attention for longer. The videos can be used multiple times both as an effective presentation tool and a quick revision of grammar structures.

Get Culture! BBC videos

A series of inspiring culture videos which recycle the topics and language of the preceding units. These videos appear in *Get Culture!* lessons following Units 1, 3, 5 and 7. Extracts of high-quality BBC footage are introduced by the popular British presenter Greg Foot at an appropriate level for the learner.

The purpose of these motivating authentic videos is to present the diversity of the English-speaking world, sparking students' imaginations and curiosity. This will encourage them to continue learning English independently.

A Unit of the Students' Book

A clear summary of content and video material is available for the unit.

Clear lesson objectives are included at the beginning of each lesson.

I know that! revision activities boost motivation.

Vocabulary sets are placed in clearly organised boxes. All lexical items are recorded for students to listen and repeat.

Varied practice activities, including listening exercises, help students remember new vocabulary.

Practice tasks in exam-like format help students prepare for exams. Vocabulary consolidation at the end of the lesson is based on personalised memorisation activities.

Boarding School – What's it really like?

In films, boarding schools are exciting places, often with magic or monsters. But what is a real British boarding school like? Thirteen-year-old Laura Henderson describes a typical day at her school.

"We wake up at 6.30 in the morning and have breakfast in the school canteen. At 8.00, the bell rings for assembly in the hall. The great thing about boarding school is that we're never late for school!

Lessons start at 9.00 and finish at 3.30. My favourite lesson is Science because we often do experiments. In the afternoon, we sometimes go to the library to read, or we do P.E. in the gym. In the evening, I often play badminton or go to a cookery class.

I go to a boarding school because my parents live in France. Do I miss them? Yes, but I've got some good friends here.

And no, we don't have any magic or monsters!"

Hollywood is famous for its film studios and for big, exciting films such as Star Wars, Titanic and

The Avengers. A lot of people live there too. But it was very different in the past

In 1900, Hollywood was a small village near Los Angeles. There was a post office, a hotel, two shops - and 500 people. In 1911 there was also a police station and a little film studio. The film industry was new, and films were very popular. A year later, in 1912, there were fifteen studios in the town! Hollywood wasn't a quiet

little town any more. It was full of actors, and there were restaurants and cinemas.

Today, Hollywood is part of Los Angeles. There are busy shopping centres, modern hotels theatres. Millions of tourists visit Hollywood every year, and many go to Universal Studios. It's a large theme park and a real film studio. Hollywood is very different from the small village of the past!

I went into town and bought a pair of trainers. They're cool!

Fast Facts: The London Tube

London has an underground train network called the Tube. It's one of the busiest in the world, and it's the oldest. The first tube train left Paddington Station in 1863, more than 150 years ago. The Tube was a lot cheaper then: a single journey cost six pence. Today it costs about £5. Let's find out more ...

Fact 1

The Tube has 40 'ghost stations', or stations that people don't use. Some ghost stations are film sets - you can see them on TV. Other ghost stations are in pop videos!

Fact 3

SWEET OR SALTY?

How do you know that biscuits are sweet and chips are salty? Because you've got lots and lots of taste buds. Where are they? Right there – on your tongue.

When you put food in your mouth, it goes on your tongue. The taste buds on your tongue tell you what taste each type of food has.

1 Lemons are <u>sour</u>.

2 Chocolate cake is

There are four different tastes: sweet, salty, sour and bitter. Food with sugar is sweet. When you eat milk chocolate or cakes, the taste buds in the front part of your tongue tell you that they are sweet. Salty food has salt on or in it, like cheese on pizza. What is a sour taste? Well, drink some lemon juice! That's sour! And the taste buds in the back part of your tongue tell you what's bitter. Black tea is bitter. Some people put sugar in their tea because they don't like the bitter taste.

3 Black tea is sometimes bitter

- Peer learning: Exercise 6
- Independent learning: Finishing the lesson

Warm-up

- (Books closed) Ask different Ss about favourite food and drink. e.g. What is your favourite food/drink?
- [6] (Books open) Ss look at page 90 in the Workbook. Explain that the objective of this lesson is to learn about the taste of food. Then write on the board: I taste food in my tongue. My tongue is in my mouth/ears. Ask Ss to choose the correct underlined word (mouth) and show where their tongue is.

Lead-in

• Teach taste buds. Say Taste buds are on your tongue. They tell you what food tastes like. Ask Ss to look at the picture of the tongue and the taste buds. Read out the words to Ss and give an example of food, e.g. Milk chocolate is sweet. Salad leaves like rocket leaves are bitter. Chips are salty. Lemons are sour.

Exercise 2 (1) 24

2 Read the text quickly. Match photos 1-6 to the words in Exercise 1.

American National Parks

Yellowstone National Park is the first national park in the world. You can do a lot of exciting things there. You can sail on the rivers and swim in the lakes. But be careful about some hot springs. They are colourful lakes with hot water. In some hot springs the water is too hot to swim. Sometimes this hot water goes high up in the air and you can watch exciting geysers. Lots of people take selfies next to them. You can also take photos of beautiful waterfalls - you only need to walk in the canyon

Many people visit the Glacier National Park to see one of its 25 glaciers. A glacier is moving ice. The park is also popular because of its mountains. The peaks - the tops of the mountains - are high. Climbing is dangerous so it's better to look and take photos or try to find some caves in the mountains! There are lakes and rivers so you can sail a boat. You can ride horses with your family and in winter you can go skiing

I liked the sculptures best because
I think art from the past is very
interesting. There was a beautiful
sculpture of a woman that I really liked.
There was also an exhibition of glass
jewellery. I don't like wearing anything

jewellery was amazing. The jewellery
from yellow glass was my favourite.

Mark I want to be an artist so I loved the paintings.

There were some paintings of people with animals that I liked a lot. I also liked the photography exhibition and I thought the black and white photos were the most interesting.

Vocabulary Flying machines

2 Read the text. Find and underline the words in Exercise 1.

A short history of flying

The first flying machines were kites. ■ The Chinese made them about 1500 years ago. They were usually triangle-shaped.

Then, there was the hot-air balloon. A fire under the balloon made the air hot. In November 1783 two men flew a hot-air balloon in France for about 8 km.

But people wanted to fly like a bird so they made gliders - flying machines with very big wings. In the 1890s they flew about 100 or 150 metres.

People wanted to fly a longer way so in 1902 in America the Wright brothers made a biplane. It had two long wings. One wing was at the top and one was under it. And a year later, they made a biplane with an engine - the Wright Flyer. Biplanes with engines flew a long way but people needed bigger planes.

This happened in the 1950s. The British, Russians and Americans made planes for many people. They had big engines in or under the wings and they flew a very long way.

3 What flying machines are they? Label the photos with words in Exercise 1.
